EXECUTIVE SUMMARY

Union County, Florida, retained PPM Consultants, Inc. (PPM) to conduct a Phase I Environmental Site Assessment (ESA) of the Tomahawk Parcel 4 located at the southwest corner of SE 6th Street and SE 2nd Drive in Lake Butler, Florida. The purpose of this assessment was to identify recognized environmental conditions in connection with the subject property by means of interviews, review of record information, and site reconnaissance. The environmental assessment was conducted in conformance with the scope of ASTM International Standard Practice E 1527-21.

PPM conducted the site reconnaissance on April 12, 2023. The subject property comprises one parcel totaling approximately 3.8 acres in size. The subject property consists of heavily wooded vacant land. The current owner of the subject property is Tomahawk II LLC.

The earliest historical record for the subject property includes an aerial photograph from 1938. According to the aerial photographs, somewhere between 1958 and 1964, a drainage ditch that bisects the subject property was added. Aerial photographs and city directories both confirm that this property has always been a vacant, wooded lot with no development besides the addition of the drainage ditch.

In 1938, all adjoining properties consisted of cleared or wooded vacant land. The first development of adjoining properties was apparent on the 1951 aerial photograph that showed a residential adjoining to the west. The 1964 aerial photograph shows another residential home adjoining to the west of the subject property. According to aerial photograph, sometime between 1964 and 1971 the adjoining property to the north was developed by a large structure that coincides with the present-day Union County Bus Garage; however, this facility was first listed at this address by the 2012 city directory. Between 1971 and 1978 the adjoining property to the southeast was mostly cleared. By 1981, there was development of the adjacent property to the southeast, where the present-day Pritchett Trucking facility is located. The 1998 and 2003 city directories list this property to be occupied by Union Trucking and Pritchett Trucking, respectively. The 1981 aerial photograph also shows the development of about 30 residences south of the subject property. The 1995 aerial photograph shows the development of the adjoining property to the northeast where present-day Pritchett Trucking fueling station is located. The aerial photographs between 1995 and 2021 show no new development of any of the adjoining properties. The 2000 city directory lists one of the adjoining properties to the south (910 SE 6th Street) as Lake Butler Motor Home Park. The historical aerials and city directories for adjoining properties remain similar until 2008 when four new residences were added to the south of the subject property.

The surrounding properties have historically consisted of vacant and residential properties to the north, south, east, and west. The surrounding area to the east and west of the subject property was first developed for residential land in the early 1960s. The first commercial development and a former clothing manufacturer to the northwest first appeared sometime between 1958 and 1964. Lake Butler Hospital appeared sometime between 1964 and 1971 to the north. The majority of the remaining commercial properties in the surrounding area developed in the 1980s.

This assessment has revealed no evidence of recognized environmental conditions (REC), controlled recognized environmental conditions (CREC), and/or significant data gaps (SDG) in connection with the subject property.

1.0 INTRODUCTION

1.1 PROPERTY IDENTIFICATION

Property Name:	Tomahawk Parcel 4			
Current Property Owner:	Tomahawk Land II, LLC (Billy Ellixson and Freddy Norris)			
Current Property Use:	Wooded Land			
Land Area in Acres:	3.8 Acres			
Street Address:	Southwest Corner of SE 6th Street and SE 2nd Drive			
County/Parish:	Union County			
City, State, Zip Code:	Lake Butler, Florida 32054			
UTM Coordinates:	30° 1' 15.39"N	Latitude	82° 19' 36.21" W	Longitude
Tax Parcel ID(s):	32-05-20-00-000-0060-0			
Date of Site Visit:	April 13, 2023			
Attachments:	Subject property location is shown in Figure 1, Site Location Map, Appendix A, Figures . Photographs of the property are provided in Appendix C .			
	The subject property is shown in Figure 2, Site/Area Map, Appendix A, Figures .			
	Legal description (if obtained) is provided in Appendix F, Other Documentation .			

1.2 PURPOSE

PPM Consultants, Inc. (PPM) was retained by Union County, Florida, the client/primary user, to conduct a Phase I Environmental Site Assessment (ESA) of the above-referenced property in accordance with ASTM Standard Practice E 1527-21. The purpose of the ASTM Standard Practice E 1527-21 is:

“to define good commercial and customary practice in the United States of America for conducting an environmental site assessment of a parcel of commercial real estate with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) and petroleum products. As such, this practice is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability (hereinafter, the “landowner liability protections,” or “LLPs”): that is, the practice that constitutes all appropriate inquiries into the previous ownership and uses of the property consistent with good commercial and customary practice as defined at 42 U.S.C. §9601(35)(B).

The goal of the process established by this practice is to identify recognized environmental conditions associated with the subject property. The term recognized environmental condition is defined by Practice E 1527-21 as:

“the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.” Release to the environment entails the migration or movement of hazardous substances or petroleum products in any form, including solids and liquids at the surface or subsurface, and vapor in the subsurface to, within, or from the subject property. If such conditions exist on the subject property, and are not de minimis, the condition is a recognized environmental condition.

Key terms used in this report that are specifically defined by Practice E 1527-21 are provided in **Section 9.0, Glossary of Key Terms**.

1.3 CONTINUED VIABILITY AND USER RELIANCE

ASTM defines the “user” as the party seeking to use Practice E 1527-21 to complete an ESA of the subject property. A user may include, without limitation, a potential purchaser of the subject property, a potential tenant of the subject property, an owner of the subject property, a lender, or a property manager. The findings and conclusions contained within this report may not be used or relied upon by any other parties without the written consent of the client/primary user that contracted PPM to conduct this assessment and PPM. The client/primary user may designate other users who may rely on this report. All users currently identified by the client/primary user are named in **Section 2.1, Users of Report**.

In accordance with the ASTM practice, all appropriate inquiry (AAI) components (interviews, government records, site reconnaissance, and declaration of environmental professional) must be completed or updated no more than 180 days prior to date of acquisition or intended transaction, and all other components must be updated within one year. The dates of AAI components are listed in the following table:

AAI Component	Date
Interviews	05/18/2023
ERIS Radius Report	04/11/2023
Regulatory Agency File Review	04/11/2023
Site Reconnaissance	04/13/2023
Declaration of Environmental Professional	06/12/2023

If a party different from the original user(s) intends to use this report, the subsequent user(s) must also satisfy the following requirements at a minimum:

- Obtain written authorization to rely on this report from the original client/primary user and PPM
- Fulfill the User’s Responsibilities outlined in **Section 2.0, User-Provided Information.**
- Contract PPM to update the report if the original report is over 180 days and less than one year old.

If the report is greater than one year old at the time of acquisition by any user, no part of the report can be relied upon in order to satisfy all appropriate inquiry.

2.0 USER-PROVIDED INFORMATION

2.1 USERS OF REPORT

Union County, Florida, contracted PPM to perform this Phase I ESA and is considered the client and the primary user of this report. The contact for Union County is Mr. Jimmy Williams, County Coordinator. Mr. Williams did not designate any other users of this report. Funding for this Phase I ESA is provided by the United States Environmental Protection Agency (US EPA) under a Brownfields Assessment Grant awarded to Union County in 2022. The information generated by this Phase I ESA will be reported to the US EPA Project Officer. The EPA Project Officer has no knowledge of the property beyond what is provided to them during the assessment process and will not “use” this information for the purpose of property acquisition by the EPA.

2.2 USER QUESTIONNAIRE

The “All Appropriate Inquiries” Final Rule (40 CFR Part 312) requires that certain tasks be performed by or on behalf of a party seeking to qualify for landowner liability protections (LLP) to CERCLA liability (i.e., the user). These tasks must also be completed by or on behalf of EPA Brownfield Assessment and Characterization grantees. While such information is not required to be provided to the environmental professional (i.e. PPM), the environmental professional must request information from the user to assist in identifying recognized environmental conditions. The User Questionnaire found in Appendix X3 of Practice E 1527-21 was provided to each of the users identified in **Section 2.1, Users of Report**. Responses to the User Questionnaire are provided in **Appendix B, User Provided Information**. Additional information provided by the user regarding their knowledge of environmental conditions at the subject property are provided in **Section 5.0, Interviews**.

2.3 ENVIRONMENTAL LIENS AND ACTIVITY USE LIMITATIONS

The primary user/client contracted PPM to conduct a search of land title records for environmental liens or activity and use limitations (AUL) filed or recorded against the subject property. The title search was performed by ERIS. This search revealed no environmental liens or AULs were filed or recorded against the subject property. The title search results are provided in **Appendix E, Other Documentation**.

2.4 OTHER INFORMATION PROVIDED BY USER(S)

Other information provided by the user(s) includes the following:

- The user stated that the reason for performing the Phase I ESA was to assess selected brownfield sites under the EPA Brownfields Assessment Grant.
- The user identified Billy Elixson and Freddy Norris at 386-496-3883 as the subject property owner and contact.

2.5 USER-SPECIFIED TERMS, CONDITIONS, AND LIMITATIONS

The primary user/client did not request or specify any special terms, conditions, limitations, or considerations that would limit, deviate from, reduce, or add to the scope of this assessment with respect to Practice E 1527-21.

3.0 SITE RECONNAISSANCE

3.1 METHODOLOGY

The objective of the site reconnaissance is to visually and physically observe the subject property and the adjoining properties for any uses or conditions that may indicate the likelihood of recognized environmental conditions in connection with the subject property. During the site reconnaissance, PPM visually inspected the grounds and structures (if any) on the subject property to the extent not obstructed by bodies of water, adjacent buildings, or other obstacles. Interior and exterior inspections focused on practices that may involve the use, treatment, storage, disposal, generation, or release of hazardous substances or petroleum products. Exterior and interior observations were made of the subject property. Observations of adjoining properties were made from the subject property and surrounding public thoroughfares and adjoining properties.

Site reconnaissance did not include invasive or physical inspections of observed releases, such as ground disturbance to determine the thickness of a spill, or opening and inspecting the contents of vaults, manholes, storage tanks, drums, and other containers suspected to contain hazardous substances or petroleum products. For large or complex properties, special methods of observation (for example, grid patterns or other systematic approaches) may have been developed by the environmental professional in order to satisfy the objective of the assessment in a timely and cost-effective manner.

For this assessment, there was no special methodology used to inspect the subject property.

3.2 LIMITING CONDITIONS ENCOUNTERED DURING SITE VISIT

General limitations and basis of review, including limitations imposed by physical obstructions such as adjacent buildings, bodies of water, asphalt, or other paved areas, and other physical constraints (e.g. snow, rain, flooding, dense vegetation, etc.) shall be noted during the site visit and documented in the report. Limiting conditions may also include potentially unsafe conditions to physical safety (e.g. criminal activity, vagrancy, seclusion, animals, dilapidated structures, uncontrolled hazardous wastes, etc.); inaccessible areas (e.g. locked gates, rooms, and buildings); and the absence of a key site manager who could provide information about observed conditions or full and safe access to the subject property during the site reconnaissance.

Due to the heavy vegetation, portions of the subject property could not be safely assessed.

3.3 SUBJECT PROPERTY OBSERVATIONS

SUBJECT PROPERTY LAND USES
The subject property comprises one parcel of land (32-05-20-00-000-0060-0) and encompasses approximately 3.8 acres. (see Photographs 1-6, Appendix C). The subject property is primarily undeveloped wooded land. The subject property is split by a city-owned right-of-way for a drainage ditch that flows from east to west through the approximate center. A power easement also runs from east to west across the southern portion of the subject property.

Were any of the following conditions observed or suspected on the subject property?
Condition
Structures & Improvements: None observed
Onsite Roads and Parking: None observed
Adjoining Roads: SE 8 th Avenue to the West, SE 2 nd Drive to the North, and SE 6 th Street to the Southeast.
Potable Water Supply/Source: None observed
Sewage Disposal System: None observed
Hazardous Substance Usage: None observed
Petroleum Product Usage: None observed
Storage Tanks: None observed
Strong Odors & Sources: None observed
Standing Surface Water, Pools, or Sumps Containing Liquids: A drainage ditch within a city-owned, right-of-way transverses the center of the property from East to West. The ditch receives storm water from a series of small ponds and ditches located east of SE 6 th Street to the north of the Pritchett Trucking office building then turning north toward SE 100 th Terrace and immediately east and north of the fueling facilities on the Pritchett Fueling facility. See Photograph 2 in Appendix C .
Drums, Totes, & Intermediate Bulk Containers: None observed
Hazardous Substance and Petroleum Product Containers not Connected with Identified Uses: None observed
Unidentified Substance Containers: None observed
PCB-containing Items: None observed
Heating/Cooling System: None observed
Stains or Corrosion on Floors, Walls, or Ceilings: None observed
Drains, Sumps, & Oil/Water Separators: None observed
Pits, Ponds, & Lagoons: None observed
Stained Soil or Pavement: None observed
Stressed Vegetation: None observed
Solid Waste Disposal: None observed
Waste Water: None observed
Wells: None observed

3.4 ADJOINING PROPERTY OBSERVATIONS

ADJOINING LAND USES	
Northwest	Residential
North	Union County School District Bus Garage and wooded land
Northeast	Pritchett Fueling Facility
East/Southeast	Pritchett Trucking Facility
South	Pritchett Trucking, residential
West	Vacant land, residential

Were any of the following conditions observed or suspected on an adjoining property?	
Condition	
Waste Water:	None observed
Pits, Ponds, & Lagoons:	A small pond at the Pritchett Trucking facility property is approximately 1,700 ft. to the southeast of the subject property.
Storage Tanks:	Aboveground Storage Tanks (AST) belonging to the adjoining Union County School District Bus Garage and the adjoining Pritchett Fueling Facility. The Pritchett Fueling Facility AST is 396 feet northeast of the subject property. The AST has secondary containment and appears to be in good condition. There are two ASTs on the adjoining Union County School District Bus Garage. These ASTs are 185 feet north of the subject property. They are also in secondary containment. See Photographs 7, 11, 12, and 21 in Appendix C .
Drums, Totes, & Other Bulk Containers:	Dozens of truck containers are stored throughout the adjoining Pritchett Trucking Facility property.
Abandoned Containers:	None observed.
Unidentified Substance Containers:	None observed
PCB-containing Items:	None observed
Strong Odors & Sources:	None observed
Stressed Vegetation:	None observed
Stained Soil or Pavement:	None observed
Solid Waste Disposal:	None observed
Wells:	There is a monitoring well 390 feet to the northeast on the adjoining Pritchett fueling facility property west of the AST. The AST is 396 feet northeast of the subject property. See Photograph 12 in Appendix C .

3.5 SURROUNDING AREA OBSERVATIONS

SURROUNDING AREA LAND USES
<p>The Pritchett Trucking facility that adjoins the subject property to the southwest is listed on several regulatory databases including as a LUST, UST, RCRA Generator, State landfill, well surveillance, and PCB site. This facility is located across SE 6th Street at a distance of approximately 85 feet from property line to property line. Land use up to a distance of approximately 215 feet is as the employee parking lot and 260 feet for the office building. A large shop building is located from 215 to 415 feet. A large truck yard is the east, south, and west of the shop building. Approximately 560 to 1,500 feet further southwest appears to be parking or stockyard for active and abandoned truck containers. It is likely that the activities using petroleum products and hazardous substances were no closer than 215 feet southeast from the subject property.</p>

4.0 RECORDS REVIEW

4.1 PHYSICAL SETTING SOURCES

4.1.1 Mandatory Standard Physical Setting Resources

PPM reviewed the most recent United States Geological Survey (USGS) 7.5 Minute Topographic Map dated 2021 for the Lake Butler, Florida Quadrangle in which the subject property is located. The map is used as the base map for **Figure 1, Site Location Map**, provided in **Appendix A**. According to this map, the subject property has an elevation range of approximately 127-131 feet above mean sea level (AMSL). The area topography slopes toward the south with a very flat gradient. Notable geographical features in the surrounding area include: Lake Butler, which is approximately 3,550 feet northwest of the subject property. Based on the range of relative elevation between the subject property of 127-131 feet and the nearest perennial body of surface water of 129 feet, the depth to groundwater beneath the subject property is estimated to be less than 5 feet below ground surface (BGS).

PPM also reviewed area-specific physical setting information that was obtained pursuant to agency file review for the Pritchett Trucking facility located 51 feet to the southeast of the subject property. Site investigations at this facility provided that the groundwater flow direction at this facility was toward the west/northwest; the depth to groundwater was 3.7 to 4.2 feet BGS; subsurface lithology consisted of sand and clay.

4.1.2 Discretionary and Non-Standard Physical Setting Resources

In the evaluation of offsite sources of hazardous substances and petroleum products, the ASTM E 1527-21 standard practice requires that known or suspected releases to the surface and subsurface be evaluated for their potential to migrate from the source of release to the subject property. The primary concern for migration in the subsurface environment is via groundwater; however, the standard practice also requires the evaluation of vapor migration. Vapor migration or encroachment in the subsurface is described in ASTM E 2600, which is not required to be applied to achieve compliance with all appropriate inquiries; however, E2600 does develop areas of concern (AOC) critical distances for vapor encroachment that are based on studies of groundwater plume lengths; therefore, can be used as defensible AOC search distances for both vapor and groundwater migration.

In the development of areas of concern (AOC) search critical distances for vapor encroachment screening per ASTM E 2600, Paper 2011-A-301-AWMA, *Methodology for Identifying the Area of Concern Around a Property Potentially Impacted by Vapor Migration for nearby Contaminated Sources*, by Anthony J. Buonicore, cited several research papers that established the 90th percentile dissolved-phase plume lengths for volatile petroleum and non-petroleum releases to be less than approximately 390 feet and 1,590 feet, respectively. Based on their cited experience, the AOC critical distances for vapor migration potential were expanded to 528 feet for petroleum and 1,760 feet for non-petroleum volatile organic compounds (VOC) for releases from up-gradient sources. These critical distances were regarded as conservative or based on relatively favorable conditions for both groundwater migration in the saturated zone and vapor migration in the vadose or unsaturated zone.

For cross-gradient sources where groundwater migration to the subject property is not considered likely, the AOC critical distances for vapor migration were reduced to 95 feet for dissolved-phase petroleum, 165 feet for free product or light non-aqueous phase liquid (LNAPL) petroleum, and 365 feet for non-petroleum. The corresponding logic was that cross-gradient groundwater migration potential to the subject property is less than that of vapor migration.

For down-gradient sources where groundwater migration to the subject property is not considered likely, the AOC critical distances for vapor migration were reduced to 30 feet for dissolved-phase petroleum, 100 feet for LNAPL petroleum, and 100 feet for non-petroleum.

The corresponding logic with each of these AOC gradient scenarios for VOC releases is that: (1) the potential distance for groundwater migration is less than the potential distance of groundwater plus vapor migration; (2) vapor can migrate independent of its groundwater source; (3) a REC can exist for vapor migration only; (4) a groundwater REC is also a vapor REC; and therefore (5) the vapor migration AOCs can also be used to conservatively evaluate groundwater migration.

The use of these AOC critical distances to evaluate non-volatile chemicals of concern (COC) would be unreasonably excessive in that they: (1) do not produce vapors and (2) are typically considerably less soluble therefore are less mobile in groundwater. Instead, non-volatile COC releases will generally be evaluated as a subject or adjoining property issue.

To be conservative with petroleum releases using this initial screening, PPM utilizes the AOC critical distances for petroleum releases with free product. With the exceptions listed below, all known or suspected releases beyond the AOC critical distances for vapor

migration will not be considered RECs in connection with the subject property. All known or suspected releases within the AOC critical distances will be further evaluated either through document review, interviews, or further evaluation of the physical setting. For example, the presence of a hydraulic barrier such as a creek will also serve as a barrier to vapor migration. If definitive information cannot be found that can be used to eliminate a known or suspected release as a REC, then its presence within a relevant AOC critical distance will be considered a REC due to vapor migration at a minimum.

The exceptions are: (1) Federal National Priority List (NPL) and Resource Conservation and Recovery Act (RCRA) transport, storage, and disposal (TSD) facilities, which require additional record review per ASTM E 1527-21 Sections 8.2.2 and 8.2.3; and (2) PPM’s personal or specialized knowledge of releases in the area that have the potential to migrate further than these critical distances, and ; (3) personal or specialized knowledge of releases or vapors reported by the subject property owner, manager, or occupants.

4.1.3 AOC Site Conceptual Model

Based on the Physical Setting review, the known/inferred groundwater flow direction in the study area is toward the west; therefore, the AOC Critical Distances for this assessment are as follows:

Contaminant Type	Gradient, Direction, Distance (feet)		
	Up-gradient	Cross-gradient	Down-Gradient
	EAST	SOUTH & NORTH	WEST
Non-Petroleum VOC	1,760	365	100
Petroleum LNAPL	528	165	100

There were no modifications made to the AOC distances for this investigation.

4.2 REGULATORY RECORD REVIEW

PPM retained the services of ERIS, a third-party database provider, to provide information available from state, local tribal, and federal databases regarding reported environmental activities and releases in the vicinity of the subject property. This information, along with other government record sources obtained during the assessment, were reviewed to help determine the likelihood of hazardous substances or petroleum products impacting the subject property.

4.2.1 Standard Environmental Record Sources

As allowed by Section 8.1.2.1 of the Standard Practice, the approximate minimum search distance (AMSD) for standard environmental record sources can be adjusted at the discretion of the environmental professional in consideration of such factors as: (1) the density of the setting in which the subject property is located; (2) the distance that the hazardous substances or petroleum products are likely to migrate subject to local geologic or hydrogeological conditions; (3) the property type; (4) existing or past uses of surrounding properties; and (5) other reasonable factors. Per ASTM, the only AMSDs that cannot be adjusted downward are for Federal National Priorities List (NPL) and Federal RCRA Transport, TSD records. If an AMSD was adjusted, the adjusted AMSD will be the AMSD used in the confirmed column.

For the subject property, there was no adjustment to the standard AMSDs.

The third-party database vendor provided the following standard environmental record sources:

SUMMARY OF THIRD-PARTY DATABASE REVIEW					
Type of Site (Abbreviations used in subsequent tables are in parentheses)		Search Distance		Number Identified	
		Standard AMSD	Adjusted AMSD	Potential within AMSD	Confirmed within AMSD
Federal Lists	NPL or Superfund (NPL)	1.0 mile		0	0
	Delisted NPL sites (DNPL)	0.5 Mile	N/A	0	0
	CERCLA Removals and Orders (RAO)	0.5 Mile	N/A	0	0
	Comprehensive Environmental Response, Compensation, and Liability System (CERCLIS) with NFRAP (NFRAP)	0.5 Mile	N/A	0	0
	RCRA undergoing Corrective Action (RCA)	1.0 Mile	N/A	0	0
	RCRA Transport, Storage, Disposal Facilities (TSD)	0.5 Mile		0	0
	RCRA Generator (GEN)	Subject and Adjoining		5	2
	Institutional/Engineering Control (IC/EC)	Subject Property		0	0
	Environmental Risk Information Services (ERNS)	Subject Property		0	0
State/Tribal	Superfund Equivalent (SNPL)	1.0 Mile	N/A	1	1
	Hazardous Waste Facilities (HWF)	0.5 Mile	N/A	0	0
	Landfill/Solid Waste Disposal (SWD)	0.5 Mile	N/A	1	1
	Leaking underground storage tank (LUST)	0.5 Mile	N/A	5	5
	Registered Storage Tank (RUST/RAST)	Subject and Adjoining		19	2
	Institutional/Engineering Control (IC/EC)	Subject Property		0	0

Voluntary Cleanup Sites (VCP)	0.5 Mile	N/A	0	0
Brownfields Sites (BF)	0.5 Mile	N/A	0	0
Database Provider:	ERIS			
Attachments:	Regulatory Record documents are provided in Appendix D, Regulatory Research Documentation.			

4.2.2 Preliminary Screening of Standard Environmental Record Sources

The first stage of evaluating Standard Sources, will consider critical and non-critical factors stated or implied by the Standard Practice. Critical factors are conditions that will require further investigation in order to determine that the condition represents a REC in connection with the subject property. Critical factors include (1) conditions existing on the subject property or on an adjoining property; (2) a Standard Source listing as a Federal NPL or Federal RCRA TSD facility; and (3) a Standard Source listing being located within a relevant AOC Critical Distance (see **Section 4.1.3, AOC Site Conceptual Model**).

Conditions existing on the subject property or on an adjoining property, Federal NPL facilities, and Federal RCRA TSD facilities will automatically proceed to further investigation by record review (**Section 4.2.3, Additional Regulatory File Review**), interviews, or observation.

Other Standard Source Listings will be further screened in this section based on the nature of the COC, which are either non-petroleum volatiles, petroleum (assumed to be free product), or non-volatiles [such as metals, polynuclear aromatic hydrocarbons (PAH), and other semi-volatile organic compounds]; known or inferred groundwater gradient orientation relative to the subject property (up, cross, or down); and distance from the subject property in feet. If the nature of the released COC is unknown at this stage, the preliminary screening will assume the COCs are worst-case non-petroleum volatiles. Unless the database provider indicates otherwise, it is assumed a release from a commercial LUST is free product petroleum. Standard Source listings located outside an AOC Critical Distance are concluded to not represent RECs in connection with the subject property; therefore, are eliminated from further discussion in this report. Standard Source listings located inside an AOC Critical Distance will proceed to **Section 4.2.3, Additional Regulatory File Review**.

PRELIMINARY SCREENING OF STANDARD REGULATORY DATABASE LISTINGS							
Facility Name	AOC Parameters					Eliminate or Proceed?	
	Site Type	COC	Gradient	Distance (feet)			Inside/Outside
				Actual	Critical		
Kwik Stop	LUST	Petroleum	Cross	691	165	Outside	Eliminate
Doyle Varnes Insurance Agency/Lake Butler Cleaners	LUST/HWF	Petroleum	Down	911	100	Outside	Eliminate
Fast Track Foods #214	LUST/HWF	Petroleum	Cross	165	528	Outside	Eliminate
Lake Butler Hospital / Ramadan Hand Institute	SPILL	Mercury	Cross	465	165	Outside	Eliminate
Lake Butler Gasoline Contamination	SNPL	Petroleum	Down	911	100	Outside	Eliminate

Record review findings for those Standard Source listings marked “proceed” are presented in **Section 4.2.3, Additional Regulatory File Review**.

4.2.3 Additional Regulatory Record Review

RECORD REVIEW FOR STANDARD SOURCE SITES	
Site Name:	Pritchett Trucking Inc / Bulldog Environmental / Lake Butler, FL
Database Map ID Reference:	1
Site Address:	1050 SE 6 th Street, Lake Butler, FL 32054
Type(s) of Site:	LST / RCRA SQG / RCRA NON-GEN / AST / SWF/LF / PCB / WELL SURVEILLANCE / TIER 2/ DWN CONTAM / UST / STCS
Database Distance & Direction:	51 ft., SE
Actual Distance & Direction:	Adjoining property to the southeast
Database Information:	<p>This facility has a RCRA Facility ID of FLR000020552 associated with Bulldog Environmental. This facility is registered as a RCRA NON-GEN. No violations as of their last compliance inspection.</p> <p>Pritchett Trucking Inc. has a RCRA Facility ID of FLD984178269 and they are a RCRA SQG. There were violations found in September 1995, October 2008, and December 2000. The waste types listed for this facility are D001 (Ignitable Waste); U061 (Benzene, 1,1'-(2,2,2-Trichloroethylidene) bis[4-Chloro- (or) DDT); U060 (Benzene, 1,1'-(2,2-Dichloroethylidene)bis[4-Chloro- (or) DDD).</p> <p>Pritchett Trucking Inc. has a storage tank ID of 8838183. A 2000 gallon new/lube oil AST was installed in July 1987 and removed from the site in April 2006. A 525-gallon waste oil AST was installed in January 1994 and is still in service. A 3000-gallon unleaded gasoline AST was installed in July 1987 and removed from the site in April 2006. There is a double-walled 4,500-gallon unleaded gasoline AST</p>

	<p>that was installed in April 2006 that is still in service. This tank has pressurized above ground piping made of steel/galvanized metal and also has dispenser liners. The double wall tank space is monitored, and visual inspections are done of the ASTs and dispenser liners. There is also a double-walled 3000-gallon vehicular diesel AST installed in July 1996 that is still in service. There is a suction piping system is above ground with no soil contact. Leak detection monitoring is completed via visual inspection and monitoring of the double-wall tank space. The tank is constructed of steel. There is a spill containment bucket and level gauges/alarms. There is also a double-walled 15,000 vehicular diesel AST installed in July 1994 that is still in service. The pressurized piping system is double-walled and has dispenser liners. Leak detection monitoring is completed via visual inspection of ASTs, monitoring of the double-wall tank space, visual inspections of dispenser liners, external piping monitoring, electrical monitoring pipe sumps, visual inspection of pipe sumps, and monitoring of double-wall pipe space. The double-wall steel tank has a spill containment bucket, tight fill, and ball check valve, level gauges/alarms, and AST containment. A 500-gallon waste oil UST was installed in January 1981 and removed from the site in September 1994. There was also A 15,000-gallon vehicular diesel UST installed in January 1981 and removed from the site in September 1994. There was a leaking storage tank with a release reported in May 2007 of vehicular diesel that contaminated the soil and groundwater. Cleanup was required. A Site Rehabilitation Completion Report was approved in December 2009. There was also another discharge of vehicular diesel in March 1992. Four hundred fifty tons of soil was removed and land farmed on the site.</p> <p>Pritchett Trucking Inc. is also listed as a SWF/LF with a facility ID of 97210. It is registered as a waste tire collector.</p> <p>Bulldog Environmental is also listed as a PCB site with a facility ID of FL0001912286. It was registered as a transporter beginning in May 1997.</p> <p>Pritchett Trucking is also listed as a Tier 2 facility for diesel fuel #2 and gasoline with a facility ID of 6113433.</p>
<p>Regulatory Agency Records:</p>	<p>Bulldog Environmental, Inc. was a certified transporter of hazardous waste in Florida from April 1996 to March 2000. The facility picks up hazardous waste from the generator's site and transports it to the designated facility. Hazardous waste was not staged at the facility. Bulldog operated in the same location as Pritchett Trucking. In December 1999, Bulldog ceased to be a hazardous waste transporter at this location. Pritchett Trucking then became the only hazardous waste transporter at this location. In February 2000, the facility's RCRA status was changed to closed/moved.</p> <p>Pritchett Trucking (Facility ID #FL0984178269) is a registered</p>

	<p>transporter of hazardous waste and had a RCRA violation in July 1995 for:</p> <ol style="list-style-type: none"> 1) Failing to post the name and telephone number of the emergency coordinator and the location of fire extinguishers and spill control equipment near a telephone. 2) Failing to file an exception report for manifest number 00724 when confirmation of proper disposal was not received. 3) The facility did not make arrangements with local authorities regarding police, fire department, hospitals, and emergency response teams training, support, and agreements in case of an emergency. <p>According to the July 1995 RCRA Inspection Report, Pritchett Trucking generated the following waste codes: D001, D006, D015, D035, D039, D040.</p> <p>According to the December 1999 Hazardous Waste Inspection Report, Pritchett Trucking received two violations:</p> <ol style="list-style-type: none"> 1) Failing to adequately characterize spent anti-freeze. 2) Failed to include transporter information for Pritchett Trucking on the manifests. <p>The facility was back in compliance on January 26, 2000.</p> <p>Pritchett Trucking also received the following violations during a Hazardous Waste Inspection in August 2008:</p> <ol style="list-style-type: none"> 1) Failing to label all containers storing used oil with the words, "used oil". 2) Failed to store waste hydraulic fluid intended to be managed as used oil, in closed, covered, or otherwise protected containers on an impenetrable surface while outside. <p>The same inspection report identified two areas of concern summarized below:</p> <ol style="list-style-type: none"> 1) Improper storage of spent lead acid batteries. Subsequent to the inspection, the facility collected all lead acid batteries and recycled them through NAPA. 2) Improper disposal of waste tires on the property.
Regulatory Agency Records:	<p>Pritchett Trucking is also listed as a LST site with a facility ID of 8838183</p> <p>In April 1992, a petroleum discharge was reported, as there was free product in all compliance wells. The free product was bailed out in July 1992, and routine monitoring of compliance wells was initiated. Subsequently, the site was admitted into the Petroleum Cleanup Participation Program (PCPP). Analytical results showed that both</p>

soils and groundwater were impacted by hydrocarbons.

In April 1993, ECT submitted the second Contamination Assessment Report (CAR) for this facility. At that time, 21 soil borings and 4 monitoring wells were installed. The CAR Addendum led to the removal of two USTs (one 15,000-gallon diesel tank; one 500-gallon used oil tank) in September 1994. Initial Remedial Action (IRA) was also completed at this time. 450 tons of soil were excavated from the tank pit area and treated in an on-site land farm. The land farm was lined and covered with 6-mil ultra violet stabilized plastic. Berms were constructed around it to control surface runoff, both onto and from the land farm area. New Monitoring wells were installed and sampled and soil vapor readings were taken in April of 1995. FDEP approved the CAR Addendum II and MOP in August 1995. The approval specified one year of quarterly monitoring. After the fourth quarter of monitoring, FDEP discontinued the requirement for monitoring in December 1996. This was done in response to legislative changes in the UST program, and the letter stated that additional work would have to be completed before NFA status could be obtained. This letter did, however, authorize the land farm to be closed because the soils met clean soil criteria. The land farm was closed shortly after authorization was received, and no additional environmental work was performed until August 2000. This work was performed after FDEP requested a limited CAR (LCAR) report for the site so that it could be admitted into PCPP.

ECT conducted additional site investigations in response to the FDEP request of July 6, 2000. Since a considerable amount of soil and groundwater quality data were available for the site, only limited additional studies were needed for the LCAR. A Monitoring Only Plan (MOP) was approved and monitoring began in June 2001. A limited scope remedial action plan (LSRAP) for the site was subsequently requested and prepared by ECT. The LSRAP was approved and the injection wells to be used with the two approved DynamOx® treatments were installed in May 2002. In July and October 2002, DynamOx® injections were conducted at the site, and these were followed by groundwater monitoring events. Two additional MOP events were conducted in August and November 2002, after the DynamOx® treatments. Field work for the seventh and eighth MOP events was conducted in February and May 2003. Then there was a pause in monitoring as the priority score was adjusted above 45, and no monitoring was conducted until October 2004 (ninth event) and April 2005 (tenth event). The ninth and tenth monitoring events were performed at a semiannual frequency. Reports describing this monitoring were submitted and approved approximately one month after the field efforts. The results led to several more oxygen sparging events were conducted throughout 2007-2008.

Regulatory Agency Records:	<p>In January 2009 FDEP requested a PARM addendum evaluating the success of the oxygen sparging and predicting the amount of time necessary to complete remediation at the site. The addendum was submitted on February 2009. In June 2009, FDEP reduced the budget and in 2013, a new work order was generated authorizing the generation of a Site Characterization Screening (SCS) Report. In March 2013, more soil borings were installed and groundwater sampling was conducted. In October 2013, the site was placed back into a screening category and place back into priority score order. As a result of soil and groundwater assessment activities conducted in June 2017, source removal was determined to be the most effective option for contamination removal. Additional monitoring, sampling, and removal activities occurred until June 2021. A well abandonment report was submitted in March 2022. The FDEP issued a Site Rehabilitation Completion Order (SRCO) in July 2022.</p> <p>In April 2023, a storage tank inspection and file review were completed and this site was determined to be in compliance.</p>
-----------------------------------	--

RECORD REVIEW FOR STANDARD SOURCE SITES	
Site Name:	Union County School Board – Bus Barn/Garage
Database Map ID Reference:	2 / 3 / 4
Site Address:	255 SE 8 th Ave / SW 6 th Ave, Lake Butler, FL 32054
Type(s) of Site:	UST / RCRA NON-GEN / DEL STORAGE TANK / WELL SURVEILLANCE / DWM CONTAM / LST / STCS /AST
Database Distance & Direction:	82 ft., North
Actual Distance & Direction:	Adjoining property to the North
Database Information:	<p>This facility is listed as a RCRA NON-GEN with a facility ID of FLR000049361. There were violations found in October 1998.</p> <p>This facility has a storage tank facility ID of 8519167. There was a discharge in January 1990. Cleanup was required and is ongoing. There is a 10,000-gallon vehicular diesel UST that was installed in May 1983 and removed from site in March 2002. There is also a 2,000-gallon double-walled unleaded gasoline AST installed in July 1987 and is currently in service. The tank is constructed from steel with secondary containment, above ground steel/galvanized metal piping with no soil contact. Spill detection monitoring is completed via visual inspection of dispenser liners and visual inspection of ASTs. There is also a 5,000-gallon vehicular diesel AST that was installed in April 1999 and is still in service. The tank is constructed with steel with secondary containment. The piping is steel/galvanized metal. Spill detection monitoring is completed via visual inspection of dispenser liners and visual inspection of ASTs.</p>

<p>Regulatory Agency Records:</p>	<p>This facility is listed as a RCRA NON-GEN with a facility ID of FLR000049361. A hazardous waste compliance inspection was conducted at the facility in October 1998. The site was found to be in violation of Florida State regulations applicable to generators of used oil. There were five drums of used oil that were not labeled and three drums collecting used oil filters that were not labeled. The drums were also used oil left on the drums and on the ground. The facility returned to compliance, therefore no enforcement action was taken.</p> <p>This facility has a storage tank facility ID of 8519167. According to Oculus, there was a diesel fuel release in January 1990. In May 1990, the analytical results revealed petroleum constituents were present in the groundwater in excess of FDEP cleanup levels. In October 1991, an inspection revealed that one compliance well was contaminated with petroleum. Initial Remedial Actions (IRAs) were conducted and approximately 200 tons of diesel fuel impacted soils were excavated and thermally treated at an off-site location. The discharge was determined eligible for participation in the Petroleum Cleanup Participation Program (PCPP) in October 1996. In 2002, a 10,000-gallon unleaded UST was removed from the site.</p> <p>In June 2007, the property received a warning letter for non-compliance after a compliance inspection. The violation was in relation to failing to maintain the concrete secondary containment unit imperiously sealed. In May 2009, the FDEP conducted a Re-Inspection Site Inspection, which resulted in violations, including “major out of compliance”. The violations included not repairing the secondary containment as cited in the June 2007 compliance inspection, contaminated soil at the fueling station that had not be excavated, disposed of or stockpiled, and monthly visual monthly inspections had not been conducted since January 2009. There was also a minor violation for not having a registration placard in plain view. In September 2009, a Re-Inspection Site Inspection was conducted and violations were recorded. The violations were related to not keeping drain valves closed, no insurance documentation on site, and the fill ports not being color-coded. In December 2010, an annual Site Inspection was completed by FDEP and the property received "major out of compliance" inspection results. The violations were in relation to not keeping drain valves closed, no insurance documentation, and for standing water, dirt, and trash inside the containment area. In April 2012, the facility received violations on their annual inspection report because the spill containment, dispenser liners and piping sumps not accessible; water and regulated substances not removed, the insurance documents were not available, and the secondary containment previously cited was not repaired.</p>
--	--

Regulatory Agency Records:	<p>In 2015, the Site participated in the Low-Scored Site Initiative (LSSI) to investigate potential remaining soil and/or groundwater petroleum impacts with the objective of achieving an LSSI No Further Action (NFA) or a Site Rehabilitation Completion Order with Conditions (SRCOC) pursuant to Section 376.3071(11)(b), Florida Statutes (FS). LSSI-NFA criteria were not achieved, and the site was put back into the Petroleum Restoration Program (PRP) for additional site rehabilitation activities once the priority score was eligible for funding. In October 2008, the FDEP completed a scoring review and changed the property’s previous score of 25 to a new score of 29. A General Site Assessment Report (GSAR) was completed in September 2020. In April 2021, FDEP approved one groundwater sampling event and the preparation a Level 1 Limited Scope Remedial Action Plan (LILSRAP). According to Oculus, a pre-construction meeting for soil excavation was held on May 08, 2023. According to documentation, it appears this release has not migrated offsite. It is unclear whether or not the plume is stable. Active cleanup/source removal is currently underway.</p>
-----------------------------------	--

4.3 OTHER ENVIRONMENTAL RECORDS

There were no other environmental records files reviewed during this assessment.

4.4 HISTORICAL RECORDS REVIEW

4.4.1 Historical Records Inventory

Historical records with information sources reviewed are summarized in the following table:

Year(s)	Record	Source	Year(s)	Record	Source
1938	Aerial	ERIS	2005	Aerial	ERIS
1949	Aerial	ERIS	2006	Aerial	ERIS
1951	Aerial	ERIS	2007	Aerial	ERIS
1958	Aerial	ERIS	2008	CD	ERIS
1964	Aerial	ERIS	2010	Aerial	ERIS
1966	TOPO	ERIS	2012	CD	ERIS
1971	Aerial	ERIS	2013	Aerial	ERIS
1978	Aerial	ERIS	2015	Aerial	ERIS
1981	Aerial	ERIS	2015	TOPO	ERIS
1984	TOPO	ERIS	2016	CD	ERIS
1987	Aerial	ERIS	2017	Aerial	ERIS
1993	TOPO	ERIS	2019	Aerial	ERIS
1995	Aerial	ERIS	2020	CD	ERIS
1998	CD	ERIS	2021	Aerial	ERIS
2000	CD	ERIS	2021	TOPO	ERIS
2003	CD	ERIS	2022	CD	ERIS

What was the first year of subject property use?	The subject property is wooded and has never been developed.
Was subject property history determined back to first use or 1940 whichever is earliest?	Yes
Were all record intervals after first use 5 years or less?	No first use
See Section 6.0, Findings and Opinions for further discussion of data failure.	
Sources may be Fire Insurance Maps (FIRE) such as Sanborn, USGS Topographic Maps (TOPO), Aerial Photographs (AERIAL), City Directories (CD), Building Department Records (BLDG), Property Tax Files (TAX), Zoning/Land Use Records (ZONE), Title Records (TITLE), or Interviews with Owners and Others (INTERVIEW). Copies of Historical Records Documentation is provided in Appendix E, Historical Records Documentation .	

4.4.2 Subject Property Historical Summary

Range	Subject Property Conditions
1938-1963	The earliest historical record for the subject property includes an aerial from 1938. The subject property was shown as undeveloped land with no roads on or near. There has never been any structures or development on the subject property.
1963-Present	In 1964, an aerial photograph depicts a drainage ditch that runs through the center of the subject property. The subject property is still wooded and undeveloped.

4.4.3 Adjoining Property Historical Summary

Year	Adjoining Property Conditions
1938	North – Undeveloped cleared lot East – Undeveloped, wooded land South – Undeveloped wooded land West – Undeveloped wooded land
1949	North – Undeveloped cleared lot East – Undeveloped, wooded land South – Undeveloped wooded land West – Undeveloped cleared land
1951	North – Undeveloped cleared lot East – Undeveloped, wooded land South – Undeveloped wooded land West – Undeveloped cleared land
1958	North – Undeveloped cleared lot East – Undeveloped, wooded land South – Undeveloped wooded land West – Residence, wooded land
1964	North – Undeveloped cleared lot East – Undeveloped, wooded land, residence South – Undeveloped wooded land West – Residences (2), wooded land
1971	North – Large commercial or industrial building resembling current structure, wooded land East – Undeveloped wooded land, small structure, possibly residential South – Undeveloped wooded land West – Residences (2), wooded land

Year	Adjoining Property Conditions (Conditions)
1978	North – Large commercial or industrial building resembling current structure, wooded land East – Undeveloped, cleared land South – large industrial facility that resembles Pritchett Trucking, 20+ residences West – Residences (3), cleared land
1981	North – Large commercial or industrial building resembling current structure, wooded land East – Undeveloped, cleared land South – Undeveloped wooded land West – Residences (3), cleared land
1985	North – Large commercial or industrial building resembling current structure, wooded land East – structure that resembles a fueling station South – large industrial facility that resembles Pritchett Trucking, 20+ residences West – Residences (3), cleared land
1998- 2008	North – No record in CD East – No record in CD South – Union Trucking Inc./Pritchett Trucking Inc. (1050 SE 6 th Street according to CD), Lake Butler Motor Home Park (910 SE 6 th Street according to CD), residential West – No record in CD
2012- 2016	North – Union County School Bus Garage (255 SE 8 th Avenue), residential East – No record in CD South – Pritchett Trucking Inc. (1050 SE 6 th Street according to CD), Lake Butler Motor Home Park (910 SE 6 th Street according to CD), residential West – No record in CD
2020- 2022	North – Union County School Bus Garage (255 SE 8 th Avenue), residential East – No record in CD South – Pritchett Trucking Inc., New River Developers Inc. (1050 SE 6 th Street according to CD), Lake Butler Motor Home Park (910 SE 6 th Street according to CD), residential West – No record in CD

4.4.4 Surrounding Property Historical Summary

There are no records of this, but according to interviews with Kellie Rhoades, there was a historical dry cleaner that operated prior to the 1950s approximately 1,200 feet to the northeast of the subject property. There is also another former clothing factory, which was mostly demolished in the early 2000s, located approximately 735 feet to the northwest of the subject property. There is also a fueling station located approximately 940 feet to the northeast of the subject property. To the north of the subject property, there is also Lake Butler Hospital (350 feet from subject property) and a CVS (660 feet from the subject property). There is also a NAPA Auto Parts Store located 560 feet to the southwest of the subject property.

5.0 INTERVIEWS

PPM conducted interviews when possible with individuals who may have knowledge of the subject property and surrounding area. The objective of interviews is to obtain information from persons likely to have actual knowledge of current and past uses or conditions of the subject property, adjoining properties, and surrounding area that may indicate the likelihood of recognized environmental conditions in connection with the subject property. The focus and quality of information is highly variable with each type of contact and individual. The persons interviewed were asked to be as specific as reasonably feasible in answering questions. Interview information is provided below:

INTERVIEW WITH SUBJECT PROPERTY OWNER	
Interviewer:	Jenny Black and Mandy Mykitta
Date(s) Attempted:	5/18/2023
Name of Contact:	Jimmy Williams
Title/Affiliation:	Union County Coordinator
Contact Information:	386-496-0027
Mr. Williams stated the following: <ul style="list-style-type: none"> · Unaware of any past spills on the subject property or surrounding properties · To his knowledge, the subject property has always been woods · The former Lake Butler Cleaners is owned by the same person that owns the former clothing factory, and it is possible that it was once a dry cleaner. 	

INTERVIEW WITH PRIMARY USER/CLIENT	
Interviewer:	Jenny Black
Date(s) Attempted:	5/18/2023
Name of Contact:	Freddy Norris
Title/Affiliation:	Subject Property Owner
Contact Information:	386-623-4523
Mr. Norris stated the following: <ul style="list-style-type: none"> · As far as he knows, the subject property has always been woods · Not personally aware of any spills on subject or surrounding properties · Only owned the property since September 2022 · The previous site owner told his realtor the site has never had any environmental issues 	

INTERVIEW WITH FIRE DEPARTMENT	
Interviewer:	Jenny Black
Date(s) Attempted:	5/18/2023
Name of Contact:	Lake Butler Fire Department
Title/Affiliation:	N/A
Contact Information:	386-496-3818
On 5/18/2023 at 10:41 AM CT, Jenny Black left a detailed voicemail and requested a call back. As of the date of this report, the fire department has not returned my call.	

6.0 FINDINGS AND OPINIONS

This section identifies those features, activities, uses, and conditions that in the judgement of the environmental professional may indicate the presence or likely presence of hazardous substances or petroleum products at the subject property. This information includes a summary of relevant findings from all sources discussed previously (site reconnaissance, government records, physical setting sources, interviews, historical sources, etc.). The opinions provided below include PPM’s rationale for concluding that a finding is or is not a recognized environmental condition (REC), controlled recognized environmental condition (CREC) historical recognized environmental condition (HREC), or de minimis condition insofar as the findings pertain to each of these conditions. If a significant data gap is identified, PPM commented how the missing information that caused the significant data gap affected our ability to provide an opinion as to whether the inquiry has identified conditions indicative of releases or threatened releases in, on, or at the subject property. If there is a significant data gap, a discussion is provided regarding whether additional information would likely assist PPM in determining whether a REC or CREC exists.

6.1 DATA GAPS

Data gaps encountered by this investigation are as follows:

- Data failure identifying subject property use consistently at 5-year intervals.
- Data gap due to the inability to thoroughly observe the subject property due to heavy vegetation.

Because PPM was able to make reasonable conclusions regarding RECs, PPM does not consider this data gap encountered to represent a significant data gap (SDG).

6.2 SUBJECT PROPERTY

6.2.1 Historical Subject Property Uses

The earliest historical record for the subject property is a 1938 aerial photograph that shows the property to be wooded land. Aerial photographs show that the drainage ditch that bisects the subject property was added sometime between 1958 and 1964. Aerial photographs and city directories both confirm that this property has always been a vacant, wooded lot with no development, besides the addition of the drainage ditch. Because the subject property has historically been vacant land with no hazardous or petroleum use, the historical use of the subject property is not considered to be a REC.

6.2.2 Current Subject Property Uses

The subject property is currently a vacant, wooded lot with no development besides the addition of the drainage ditch which is present on a city-owned right-of-way. Because the subject property has no obvious signs of hazardous or petroleum use, the current use of the subject property is not considered to be a REC.

6.3 ADJOINING/SURROUNDING LAND USES

6.3.1 Historical Uses

In 1938, all adjoining properties consisted of cleared or wooded vacant land. The first development of adjoining properties is seen on the 1951 aerial photograph that shows a residential adjoining to the west. The 1964 photograph aerial shows another residential home adjoining to the west of the subject property.

In 1938, all adjoining properties consisted of cleared or wooded vacant land. The first development of adjoining properties was apparent on the 1951 aerial photograph that showed a residential adjoining to the west. The 1964 aerial photograph shows another residential home adjoining to the west of the subject property. According to aerial photograph, sometime between 1964 and 1971 the adjoining property to the north was developed by a large structure that coincides with the present-day Union County Bus Garage; however, this facility was first listed at this address by the 2012 city directory. Between 1971 and 1978 the adjoining property to the southeast was mostly cleared. By 1981, there was development of the adjacent property to the southeast, where the present-day Pritchett Trucking facility is located. The 1998 and 2003 city directories list this property to be occupied by Union Trucking and Pritchett Trucking, respectively. The 1981 aerial photograph also shows the development of about 30 residences south of the subject

property. The 1995 aerial photograph shows the development of the adjoining property to the northeast where present-day Pritchett Trucking fueling station is located. The aerial photographs between 1995 and 2021 show no new development of any of the adjoining properties. The 2000 city directory lists one of the adjoining properties to the south (910 SE 6th Street) as Lake Butler Motor Home Park. The historical aerials and city directories for adjoining properties remain similar until 2008 when four new residences were added to the south of the subject property.

The surrounding properties have historically consisted of vacant and residential properties to the north, south, east, and west. The surrounding area to the east and west of the subject property was first developed for residential land in the early 1960s. The first commercial development and a former clothing manufacturer to the northwest first appeared sometime between 1958 and 1964. Lake Butler Hospital appeared sometime between 1964 and 1971 to the north. The majority of the remaining commercial properties in the surrounding area developed in the 1980s. With the possible exceptions of the current uses of the adjoining properties located to the north (Union County School Bus Garage) and east (Pritchett Trucking), which are discussed in the next section, the historical uses of the adjoining properties are not considered to be a REC in connection with the subject property.

6.3.2 Current Uses

Sometime between 1971 and 1978, the adjoining property to the southeast was mostly cleared. By 1981 there was development of the adjoining property to the southeast which is where the present-day Pritchett Trucking is located. The 1995 aerials show the development of the property adjoining to the south/southeast, which is where the present-day Pritchett Trucking fueling station is located. Known operators include Union Trucking, Bulldog Environmental, and Pritchett Trucking whose operations appear to overlap in the 1990s. Bulldog was listed as a non-generator in 1999. Pritchett Trucking, the current operator, is listed as an RCRA SQG, LUST, AST, and STCS (equivalent to LUST) facility. The earliest regulatory listing for Pritchett was in 1987. The only reported releases at the Pritchett facility were a vehicular diesel spill in March 1992 that impacted 450 tons of soil and a leaking storage tank of vehicular diesel in May 2007 that contaminated soil and groundwater. The FDEP issued a Site Rehabilitation Completion Order (SRCO) in July 2022. These two past releases are not considered to represent RECs in connection with the subject property.

The vehicular storage tanks for the Pritchett facility have been present on the adjoining property to the northeast since 1995, so this is most likely the location on the 2007 vehicular diesel release. There are currently two ASTs within secondary containment located approximately 415 feet east-northeast of the subject property. A monitoring well is

located near the tanks that may be used as for early leak detection. A surface spill that might escape the secondary containment should flow into a retention pond located north of the tanks. If the area was flooded, it is possible a release could then flow a distance of over 900 feet from this pond to the subject property via the stormwater drainage ditch that passes through the property, but any petroleum residue deposited along the banks would impact the city-owned right-of-way, not the property. This route of migration is possible, but is not considered a likely threat to migrate to the subject property; therefore, is not considered to be a REC.

According to FDEP records, the Pritchett facility has received numerous compliance violations over the years, but none were associated with releases. All of the operations that potentially used hazardous substances on the Pritchett trucking facility are greater than 215 feet from the subject property. In the absence of any known releases and distance, the activities on the Pritchett Trucking facility to the southeast are not considered to represent RECs in connection with the subject property.

Union County Bus Garage, the adjoining property to the north, is listed as an RCRA non-generator of hazardous waste and LUST facility. The facility still makes use of two ASTs that are located within secondary containment and located approximately 170 feet north, which is cross-gradient in relation with the subject property. This facility is currently undergoing an active cleanup for a diesel release that occurred in 1990. According to FDEP records, the plume does not appear to have migrated via groundwater to the subject property after more than 30 years. The next consideration is vapor migration, which is also considered to be unlikely due to the semi-volatile nature of diesel and the distance to the cross-gradient point of release (170 feet), which is outside the critical distance (100 feet) outlined in section 4.1.3 of this report. Based on the unlikelihood that this diesel release has migrated to the subject property via groundwater or soil vapor, this condition is not considered to be a REC in connection with the subject property.

6.4 CONCLUSIONS

PPM has performed a Phase I Environmental Site Assessment in conformance with the Southwest Corner of SE 6th Street and SE 2nd Drive, Lake Butler, Florida, the subject property. Any exceptions to, or deletions from, this practice are described in **Sections 2.5, User Specified Terms, Conditions, and Limitations** of this report.

This assessment has revealed no evidence of RECs, CRECS, and/or SDGs in connection with the subject property.

6.5 ADDITIONAL INVESTIGATION OPINION

In accordance with Practice E1527-21, PPM has provided an opinion regarding additional appropriate investigation, if any, in the circumstance when greater certainty is required regarding the identification of recognized environmental conditions. This opinion does not render the assessment incomplete and is not intended to constitute a recommendation for a Phase II ESA or other assessment activities. Recommendations are not required by this practice and will only be provided at the request of the user.

It is PPM's professional opinion that additional investigation is not warranted to detect the presence of hazardous substances or petroleum products beneath the subject property.

6.6 ENVIRONMENTAL PROFESSIONAL STATEMENT

I, Gregory Stover, declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR § 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. My signature is provided on the cover of this report. My environmental professional qualifications are provided in **Appendix G, Qualifications of Environmental Professionals** of this report.

7.0 NON-SCOPE SERVICES

PPM did not provide any additional services outside the scope of Practice E1527-21.

GLOSSARY OF KEY TERMS

The following is a list of key terms used in this report with definitions per Practice E1527-21:

legal or physical restrictions or limitations on the use of, or access to, a site or facility: (1) to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil, soil vapor, groundwater, and/or surface water on the property, or (2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no

institutional and/or engineering controls, are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil, soil vapor, groundwater, and/or surface water on a property.

any real property or properties the border of which is contiguous or partially contiguous with that of the subject property, or that would be contiguous or partially contiguous with that of the subject property but for a street, road, or other public thoroughfare separating them.

a person may qualify a requirements, such person made “all appropriate inquiries into the previous ownership and uses of the facility in accordance with generally accepted good commercial and customary standards and practices.” Knowledge of contamination resulting from all appropriate inquiries would not generally preclude this liability protection. A person must make all appropriate inquiries on or before the date of purchase.

a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice.

a person may qualify for the contiguous property owner liability protection if, among other requirements, such person owns real property that is contiguous to, and that is or may be contaminated by hazardous substances from other real property that is not owned by that person. Furthermore, such person conducted all appropriate inquiries at the time of acquisition of the subject property and did not know or have reason to know that the subject property was or could be contaminated by a release or threatened release from the contiguous property. The all appropriate inquiries must not result in knowledge of contamination. If it does, then such person did “know” or “had reason to know” of contamination and would not be eligible for the contiguous property owner liability protection.

recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

a failure to achieve the historical research objectives set by Practice E1527-21 even after reviewing the standard historical sources listed by Practice E1527-21 that are reasonably ascertainable and likely to be useful. Data failure is one type of data gap.

a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to, site reconnaissance (for example, an inability to conduct the site visit), and interviews (for example, an inability to interview the key site manager, regulatory officials, etc.).

a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a de minimis condition is not a recognized environmental condition nor a controlled recognized environmental condition.

CERCLA 42 U.S.C. § 9601(8) defines “environment” to mean (A) the navigable waters, the waters of the contiguous zone, and the ocean waters of which the natural resources are under the exclusive management authority of the United States under the Magnuson-Stevens Fishery Conservation and Management Act [16 U.S.C. 1801 et seq.], and (B) any other surface water, ground water, drinking water supply, land surface or subsurface strata, or ambient air within the United States or under the jurisdiction of the United States.

a charge, security, or encumbrance upon title to a property to secure the payment of a cost, damage, debt, obligation, or duty arising out of response actions, cleanup, or other remediation of hazardous substances or petroleum products upon a property.

a person meeting the education, training, and experience requirements as set forth in 40 CFR §312.10(b).

a substance defined as a hazardous substance pursuant to CERCLA 42 U.S.C. §9601(14), as interpreted by EPA regulations and the courts. The term does not include petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or designated as a *hazardous substance*, and the term does not include natural gasoline, natural gasoline liquids, liquefied natural gasoline, or synthetic gasoline usable for fuel (or mixtures of natural gasoline and such synthetic gasoline).

: a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations). A historical recognized environmental condition is not a recognized environmental condition.

One of the three Landowner Liability Protections (LLPs). A person may qualify as one of three types of innocent landowners: (i) a person who “did not know and had no reason to know” that contamination existed on the property at the time the purchaser acquired the property; (ii) a government entity which acquired the property by escheat, or through any other involuntary transfer or acquisition, or through the exercise of eminent domain authority by purchase or condemnation; and (iii) a person who “acquired the facility by inheritance or bequest.” To qualify for the innocent landowner defense, such person must have made all appropriate inquiries on or before the date of purchase. Furthermore, the all appropriate inquiries must not have resulted in knowledge of the contamination. If it does, then such person did “know” or “had reason to know” of contamination and would not be eligible for the innocent landowner defense.

the person identified by the owner or operator of a property as having good knowledge of the uses and physical characteristics of the property.

landowner liability protections under CERCLA; these protections include the bona fide prospective purchaser liability protection, contiguous property owner liability protection, and innocent landowner defense from CERCLA liability. See 42 U.S.C. §§9601(35)(A), 9601(40), 9607(b), 9607(q), 9607(r).

obvious threat which is likely to lead to a release and that, in the opinion of the environmental professional, would likely result in impact to public health or the environment. An example might include an aboveground storage tank system that contains a hazardous substance and which shows evidence of damage. The damage would represent a material threat if it is deemed serious enough that it may cause or contribute to tank integrity failure with a release of contents to the environment.

or the purposes of this practice, “migrate” and “migration” refers to the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface.

that which is plain or evident; a condition or fact that could not be ignored or overlooked by a reasonable observer.

owner generally the fee owner of record of a property.

those substances included within the meaning of the petroleum exclusion to CERCLA, 42 U.S.C. §9601(14), as interpreted by the courts and EPA, that is: petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or designated as a hazardous substance under Subparagraphs (A) through (F) of 42 U.S.C. § 9601(14), natural gasoline, natural gasoline liquids, liquefied natural gasoline, and synthetic gasoline usable for fuel (or mixtures of natural gasoline and such synthetic gasoline). (The word fraction refers to certain distillates of crude oil, including gasoline, kerosene, diesel oil, jet fuels, and fuel oil, pursuant to Standard Definitions of Petroleum Statistics.)

information that is practically reviewable means that the information is provided by the source in a manner and in a form that, upon examination, yields information relevant to the subject property without the need for extraordinary analysis of irrelevant data. The form of the information shall be such that the user can review the records for a limited geographic area. Records that cannot be feasibly retrieved by reference to the location of the subject property or a geographic area in which the subject property is located are not generally practically reviewable. Most data-bases of public records are practically reviewable if they can be obtained from the source agency by the county, city, zip code, or other geographic

by the source agency only chronologically are not generally practically reviewable. Listings in publicly available records which do not have adequate address information to be located geographically are not generally considered practically reviewable. For large databases with numerous records (such as RCRA hazardous waste generators and registered under-ground storage tanks), the records are not practically reviewable unless they can be obtained from the source agency in the smaller geographic area of zip codes. Even when information is provided by zip code for some large databases, it is common for an unmanageable number of

the sites that are likely to be listed in any given zip code because that information would not be practically reviewable. In other words, when so much information is generated that it cannot be feasibly reviewed regarding its impact on the subject property, it is not practically reviewable.

the land.

information that is (1) publicly available, (2) obtainable from its source within reasonable time and cost constraints, and (3) practically reviewable.

1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment;(2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment..

a release of any hazardous substance or petroleum product shall have the same meaning as the definition of “release” in CERCLA 42 U.S.C. § 9601(22)). The first element for establishing CERCLA liability is that there must be a release or threatened release of hazardous substances from a facility or a vessel. A release or threatened release of a hazardous substance includes any “spilling, leaking, lift, pouring, emitting, emptying, discharging, injecting, escaping, leaching, dumping or disposing into the environment (including the abandonment or discarding of barrels, containers and other closed receptacles containing any hazardous substance, or pollutant or contaminant.”

a data gap that affects the ability of the environmental professional to identify a recognized environmental condition.

the property that is the subject of the environmental site assessment described in this practice.

the party seeking to use Practice E1527 to complete an environmental site assessment of the subject property.

APPENDIX B – USER PROVIDED INFORMATION

USER QUESTIONNAIRE FORM

For your convenience, PPM has prepared this form to help you, the user of the Phase I ESA to easily provide "Client responsibility" and other pertinent information. Please complete the form at your discretion and return to PPM with the authorization to proceed for inclusion in the report.

Did your search of recorded land title records identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?	Yes <input type="radio"/> No <input type="radio"/>
Did your search of recorded land title records identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?	Yes <input type="radio"/> No <input type="radio"/>
If you have not searched land title records, do you request PPM to provide this service to you for an additional fee?	Yes <input type="radio"/> No <input type="radio"/>
Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	Yes <input type="radio"/> No <input type="radio"/>
Does the purchase price being paid for this property reasonably reflect the fair market value of the property?	Yes <input type="radio"/> No <input type="radio"/>
If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	Yes <input type="radio"/> No <input type="radio"/>
Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example,	
(a.) Do you know the past uses of the property?	Yes <input type="radio"/> No <input type="radio"/>
(b.) Do you know of specific chemicals that are present or once were present at the property?	Yes <input type="radio"/> No <input type="radio"/>
(c.) Do you know of spills or other chemical releases that have taken place at the property?	Yes <input type="radio"/> No <input type="radio"/>
(d.) Do you know of any environmental cleanups that have taken place at the property?	Yes <input type="radio"/> No <input type="radio"/>
Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?	Yes <input type="radio"/> No <input type="radio"/>
Can you provide any documentation relevant to the assessment such as previous Phase I or II ESAs, UST closure assessments, site investigations, or other records?	Yes <input type="radio"/> No <input type="radio"/>
Can you provide any site maps, legal descriptions, or other information that will clearly define the property boundaries?	Yes <input type="radio"/> No <input type="radio"/>

Piping

Piping Description: A-Abv, no soil contact

Piping Description: I-Suction piping system

Monitoring

Monitoring Desc: Q-Visual inspection of ASTs

Monitoring Desc: F-Monitor dbl wall tank space

Tank Construction

Constr Code: C
Constr Desc: Steel

Constr Code: M
Constr Desc: Spill containment bucket

Constr Code: P
Constr Desc: Level gauges/alarms

Constr Code: I
Constr Desc: Double wall

Tank Information

Tank ID:	6	Tank Desc:	Double Walled
Tank Status:	U - IN SERVICE	Capacity:	15000
Status Date:	01-JUL-1994	Placement:	ABOVEGROUND
Installation Date:	01-JUL-1994	Tank Vessel Indic:	TANK
Content Desc:	D - Vehicular Diesel		

Piping

Piping Description: F-Double wall

Piping Description: J-Pressurized piping system

Piping Description: K-Dispenser liners

Monitoring

Monitoring Desc: Q-Visual inspection of ASTs

Monitoring Desc: F-Monitor dbl wall tank space

Monitoring Desc: 4-Visual inspect dispenser liners

Monitoring Desc: 6-External piping monitoring

Monitoring Desc: 3-Electronic monitor pipe sumps

Monitoring Desc: 2-Visual inspect pipe sumps

Monitoring Desc: K-Monitor dbl wall pipe space

Tank Construction

Constr Code: M
Constr Desc: Spill containment bucket

Constr Code: I
Constr Desc: Double wall

Constr Code: O
Constr Desc: Tight fill

Constr Code: A
Constr Desc: Ball check valve

Constr Code: C
Constr Desc: Steel

FDEP - Storage Tank Contamination Monitoring (STCM) Details

Name: Fast Track Foods #214
 1200 E Main St
 Lake Butler, FL 32054
LL Method: DPHO - Autonomous GPS
Account Owner: Land O'Sun Management Corp
Contact: Alan Fogg
Phone: 386-496-3016
District: NED
County 1: 63 - Union
Latitude: 30:01:22.3889
Longitude: 82:19:27.1736

FDEP - Registered Tanks from Storage Tank Contamination Monitoring (STCM) Details

Tank No: 4
Size: 12000
Content: Unleaded Gas
Installed: 02/01/2000
Placement: UNDER
Status: In Service
Construction: A - Ball Check Valve
 F - Fiberglass Clad Steel
 I - Double Wall
 M - Spill Containment Bucket
 O - Tight Fill
Piping: P - Level Gauges/Alarms
 J - Pressurized Piping System
 K - Dispenser Liners
 M - Double Wall - Pipe Jacket
 N - Approved Synthetic Material
Monitoring: 2 - Visual Inspect Pipe Sumps
 4 - Visual Inspect Dispenser Liners
 F - Monitor Dbl Wall Tank Space
 G - Electronic Line Leak Detector
 H - Mechanical Line Leak Detector
 S - Statistical Inventory Reconcile

FDEP - Registered Tanks from Storage Tank Contamination Monitoring (STCM) Details

Tank No: 1
Size: 4000
Content: Unleaded Gas
Installed: 12/01/1981
Placement: UNDER

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13 and E1527-21, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

Formerly Utilized Sites Remedial Action Program:

[DOE FUSRAP](#)

The U.S. Department of Energy (DOE) established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from the Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations. The DOE Office of Legacy Management (LM) established long-term surveillance and maintenance (LTS&M) requirements for remediated FUSRAP sites. DOE evaluates the final site conditions of a remediated site on the basis of risk for different future uses. DOE then confirms that LTS&M requirements will maintain protectiveness.

Government Publication Date: Mar 4, 2017

National Priority List:

[NPL](#)

Sites on the United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Jan 25, 2023

National Priority List - Proposed:

[PROPOSED NPL](#)

Sites proposed by the United States Environmental Protection Agency (EPA), the state agency, or concerned citizens for addition to the National Priorities List (NPL) due to contamination by hazardous waste and identified by the EPA as a candidate for cleanup because it poses a risk to human health and/or the environment. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Jan 25, 2023

Deleted NPL:

[DELETED NPL](#)

Sites deleted from the United States Environmental Protection Agency (EPA)'s National Priorities List. The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Jan 25, 2023

SEMS List 8R Active Site Inventory:

[SEMS](#)

The U.S. Environmental Protection Agency's (EPA) Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted. This data includes SEMS sites from the List 8R Active file as well as applicable sites from the SEMS GIS/REST file layer obtained from EPA's Facility Registry Service.

Government Publication Date: Jan 25, 2023

Inventory of Open Dumps, June 1985:

[ODI](#)

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

SEMS List 8R Archive Sites:

[SEMS ARCHIVE](#)

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. This data includes sites from the List 8R Archived site file.

Government Publication Date: Jan 25, 2023

Comprehensive Environmental Response, Compensation and Liability Information System -

[CERCLIS](#)

CERCLIS:

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

EPA Report on the Status of Open Dumps on Indian Lands:

[IODI](#)

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

CERCLIS - No Further Remedial Action Planned:

[CERCLIS NFRAP](#)

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens:

[CERCLIS LIENS](#)

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA). This database was provided by the United States Environmental Protection Agency (EPA). Refer to SEMS LIEN as the current data source for Superfund Liens.

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action:

[RCRA CORRACTS](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Jan 23, 2023

RCRA non-CORRACTS TSD Facilities:

[RCRA TSD](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by RCRA.

Government Publication Date: Jan 23, 2023

RCRA Generator List:

[RCRA LQG](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

Government Publication Date: Jan 23, 2023

RCRA Small Quantity Generators List:

[RCRA SQG](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

Government Publication Date: Jan 23, 2023

RCRA Very Small Quantity Generators List:

[RCRA VSQG](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

Government Publication Date: Jan 23, 2023

RCRA Non-Generators:

[RCRA NON GEN](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Jan 23, 2023

RCRA Sites with Controls:

[RCRA CONTROLS](#)

List of Resource Conservation and Recovery Act (RCRA) facilities with institutional controls in place. RCRA gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances.

Government Publication Date: Jan 23, 2023

Federal Engineering Controls-ECs:

[FED ENG](#)

This list of Engineering controls (ECs) is provided by the United States Environmental Protection Agency (EPA). ECs encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. The EC listing includes remedy component data from Superfund decision documents issued in fiscal years 1982-2020 for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Dec 22, 2022

Federal Institutional Controls- ICs:

FED INST

This list of Institutional controls (ICs) is provided by the United States Environmental Protection Agency (EPA). ICs are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site. The IC listing includes remedy component data from Superfund decision documents issued in fiscal years 1982-2020 for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Dec 22, 2022

Land Use Control Information System:

LUCIS

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

Government Publication Date: Sep 1, 2006

Institutional Control Boundaries at NPL sites:

NPL IC

Boundaries of Institutional Control areas at sites on the United States Environmental Protection Agency (EPA)'s National Priorities List, or Proposed or Deleted, made available by the EPA's Shared Enterprise Geodata and Services (SEGS). United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. Institutional controls are non-engineered instruments such as administrative and legal controls that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy.

Government Publication Date: Jan 25, 2023

Emergency Response Notification System:

ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System:

ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System:

ERNS

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

Government Publication Date: Jan 16, 2023

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database:

FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This data is provided by the United States Environmental Protection Agency (EPA) and includes Brownfield sites from the Cleanups in My Community (CIMC) web application.

Government Publication Date: Sep 13, 2022

FEMA Underground Storage Tank Listing:

FEMA UST

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

Facility Response Plan:

[FRP](#)

List of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: Dec 31, 2021

Delisted Facility Response Plans:

[DELISTED FRP](#)

Facilities that once appeared in - and have since been removed from - the list of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: Dec 31, 2021

Historical Gas Stations:

[HIST GAS STATIONS](#)

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

Government Publication Date: Jul 1, 1930

Petroleum Refineries:

[REFN](#)

List of petroleum refineries from the U.S. Energy Information Administration (EIA) Refinery Capacity Report. Includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year located in the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and other U.S. possessions. Survey locations adjusted using public data.

Government Publication Date: Aug 30, 2022

Petroleum Product and Crude Oil Rail Terminals:

[BULK TERMINAL](#)

List of petroleum product and crude oil rail terminals made available by the U.S. Energy Information Administration (EIA). Includes operable bulk petroleum product terminals located in the 50 States and the District of Columbia with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil that were active between 2017 and 2018. Petroleum product terminals comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings. Survey locations adjusted using public data.

Government Publication Date: Jun 29, 2022

LIEN on Property:

[SEMS LIEN](#)

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) provides Lien details on applicable properties, such as the Superfund lien on property activity, the lien property information, and the parties associated with the lien.

Government Publication Date: Jan 25, 2023

Superfund Decision Documents:

[SUPERFUND ROD](#)

This database contains a list of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include completed Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD) for active and archived sites stored in the Superfund Enterprise Management System (SEMS), along with other associated memos and files. This information is maintained and made available by the U.S. Environmental Protection Agency.

Government Publication Date: Dec 22, 2022

State

Superfund Waste Cleanup & State-Funded Action Sites:

[SHWS](#)

List of hazardous waste cleanup sites participating in various federal and state funded cleanup programs. Florida's State-Funded Action Sites and Superfund Waste Cleanup Sites lists are maintained and made available by the Florida Department of Environmental Protection (FDEP). This database is state equivalent CERCLIS.

Government Publication Date: Mar 16, 2023

Delisted State-Funded Action Sites:

[DELISTED SHWS](#)

This database contains a list of closed hazardous waste sites of various federal and state funded cleanup programs that were removed from the Florida Department of Environmental Protection (FDEP).

Government Publication Date: Mar 16, 2023

ERIC Waste Cleanup:

ERIC

Environmental Restoration Integrated Cleanup (ERIC) is a single database for tracking contaminated site cleanup activities in the Florida Department of Environmental Protection (DEP)'s Division of Waste Management (DWM). Includes records from 11 different DEP data systems, allowing tracking of a contaminated site throughout the course of cleanup regardless of which program area took the lead.

Government Publication Date: Feb 8, 2023

Florida Department of Environmental Protection Cleanup Sites:

CLEANUP DEP

The Cleanup Sites layer feeds the FDEP's Contamination Locator Map (CLM). It provides locations and document links for sites currently in the cleanup process and sites awaiting cleanup funding. Cleanup programs include: Brownfields, Petroleum, EPA Superfund (CERCLA), Drycleaning, Responsible Party Cleanup, State Funded Cleanup, State Owned Lands Cleanup and Hazardous Waste Cleanup.

Government Publication Date: Feb 22, 2023

Waste Cleanup Responsible Party Sites:

WCRPS

List of Open, Closed, and Inactive Waste Cleanup Responsible Party sites made available by the Florida Department of Environmental Protection.

Government Publication Date: Apr 11, 2021

Delisted Waste Cleanup Sites:

DELISTED WCP

List of sites which once appeared on - and have since been removed from - the list of Waste Cleanup Sites made available by the Florida Department of Environmental Protection.

Government Publication Date: Feb 22, 2023

Solid Waste Facilities and Landfills:

SWF/LF

The Solid Waste Facility Inventory Report made available by the Florida Department of Environmental Protection (FDEP) includes all types of authorized and unauthorized facilities: municipal solid waste, landfills, dumps, construction and demolition disposal, recycling facilities, and more.

Government Publication Date: Nov 24, 2022

Leaking Tanks:

LST

The Storage Tank Regulation Section is part of the Petroleum Restoration Program in the Florida Department of Environmental Protection (FDEP)'s Division of Waste Management. In 1983, Florida was one of the first states in the union to pass legislation and adopt rules for underground and aboveground storage tank systems. Since then, over 28,000 facilities have reported discharges of petroleum products from storage tank systems. Florida relies on groundwater for about 92 percent of its drinking water needs, and has some of the most stringent rules in the country.

Government Publication Date: Mar 23, 2023

Delisted Leaking Tanks:

DELISTED LST

Whereas Leaking Tanks (LST) includes only facilities which currently have contamination as recorded by the Florida Department of Environmental Protection, this list contains facilities which were once included in LST data but no longer appear on the list made available by FDEP. Facilities may be removed from the current LST list because the discharge has been cleaned up, or the discharge is not required for 62-770.

Government Publication Date: Mar 23, 2023

Underground Storage Tanks:

UST

List of Underground Storage Tank facilities made available by the Florida Department of Environmental Protection (FL DEP). Includes facilities tracked for active storage tanks, storage tank history, or petroleum cleanup activity. In an effort to minimize the occurrence and environmental risks of releases and discharges, FDEP administers standards pertaining to the construction, installation, operation, maintenance, repair, closure, and disposal of underground storage tank systems that store regulated substances.

Government Publication Date: Feb 13, 2023

Aboveground Storage Tanks:

AST

List of Aboveground Storage Tank facilities made available by the Florida Department of Environmental Protection (FL DEP). Includes facilities tracked for active storage tanks, storage tank history, or petroleum cleanup activity. The Florida Department of Environmental Protection (FDEP) provides standards for aboveground storage tanks (ASTs) that have individual storage tank capacities greater than 550 gallons. The state also regulates the registration, construction, installation, operation, maintenance, repair, closure, and disposal of storage tank systems that store regulated substances.

Government Publication Date: Feb 13, 2023

Storage Tank Facilities:

TANK

List of storage tank facilities made available by the Florida Department of Environmental Protection (FL DEP) for which tank information is not available. In the case of closed facilities - where all tanks have been removed or closed, and there is also no petroleum discharge or on-going cleanup activity - the owner data may not be current, but rather would represent the most recent information made available to FL DEP.

Delisted AST UST Storage Tanks:

[DEL UST AST TANK](#)

This database contains a list of closed UST and AST storage tank sites that were removed from the Florida Department of Environmental Protection (FDEP) storage tank database.

Government Publication Date: Jul 2, 2015

Delisted Storage Tanks:

[DEL STORAGE TANK](#)

List of sites that once appeared on - and have since been removed from - the list of UST and AST storage tank facilities made available by the Florida Department of Environmental Protection.

Government Publication Date: Mar 1, 2023

Federal Facilities Listing:

[FF TANKS](#)

The Florida Department of Environmental Protection (FDEP) Storage Tank Program registers facilities and storage tanks where aboveground or underground storage tanks store pollutants, hazardous substances, and/or mineral acid substances regulated by Chapter 62-761, Florida Administrative Code, or when aboveground storage tanks or compression vessels store a hazardous substance which requires registration according to Chapter 376, Florida Statutes.

Government Publication Date: Mar 1, 2023

Storage Tank/Contaminated Facility Search:

[STCS](#)

List of facilities and tanks in the Florida Department of Environmental Protection (FDEP) Bureau of Petroleum Storage Systems Storage Tank/Contaminated Facility Search which do not currently have active, regulated underground or aboveground storage tanks (USTs or ASTs) containing petroleum. Note that tank details do not appear for facilities for which all tanks have been removed.

Government Publication Date: Nov 21, 2022

Institutional Controls Registry:

[INST](#)

The Institutional Controls registry is maintained by the Florida Department of Environmental Protection (FDEP). The registry aims to help preserve adequate protection of contaminated soil regions and help to minimize any chances of exposure.

Government Publication Date: Feb 21, 2023

Engineering Controls:

[ENG](#)

A listing of all engineering controls that are in place to eliminate or reduce the potential for contaminant migration and exposure to contaminants. These controls may include caps, barriers, guards or fences. The list is maintained by the Florida Department of Environmental Protection (FDEP).

Government Publication Date: Feb 21, 2023

Voluntary Cleanup Sites:

[VCP](#)

A listing of active and closed voluntary cleanup sites registered by the Florida Department of Environmental Protection (FDEP).

Government Publication Date: Jul 1, 2022

Brownfield Sites:

[BROWNFIELDS](#)

Brownfields are defined by the Florida Department of Environmental Protection (FDEP) as abandoned, idled, or underused industrial and commercial facilities where expansion or redevelopment is complicated by real or perceived environmental contamination. This is a list of sites within designated Brownfield Areas within Florida where Brownfield Site Rehabilitation Agreement (BSRA)s have been executed between FDEP and a responsible party.

Government Publication Date: Sep 8, 2021

Brownfield Areas:

[BROWNFIELD AREA](#)

Brownfields are defined by the Florida Department of Environmental Protection (FDEP) as abandoned, idled, or underused industrial and commercial facilities where expansion or redevelopment is complicated by real or perceived environmental contamination. This is a list of Brownfield Areas, defined by the FDEP as contiguous areas of one or more brownfield sites, some of which may not be contaminated, that have been designated as such by a local government resolution. Such areas may include all or portions of community redevelopment areas, enterprise zones, empowerment zones, other such designated economically deprived communities and areas, and Environmental Protection Agency (EPA) designated brownfield pilot projects. Because a variety of sources and methods were used to derive information for this data, locations are approximate.

Government Publication Date: Jun 21, 2022

Hazardous Waste Facility List:

[HAZ WASTE FAC](#)

List of Hazardous Waste Financial Assurance Facilities made available by the Division of Waste Management of the Florida Department of Environmental Protection (FDEP). The FDEP's Hazardous waste financial responsibility requirements exist to ensure that certain hazardous waste facilities and transporters have the financial resources available to provide for closure, postclosure and corrective action requirements and/or pay for bodily injury or property damage that might result from accidents, spills or other unexpected events, known as liabilities. These closure, postclosure, corrective action and liability requirements are called financial assurance.

Government Publication Date: Jan 3, 2023

Tribal

Leaking Underground Storage Tanks on Tribal/Indian Lands:

[INDIAN LUST](#)

This list of leaking underground storage tanks (LUSTs) on Tribal/Indian Lands in Region 4, which includes Florida, is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Nov 23, 2022

Underground Storage Tanks on Tribal/Indian Lands:

[INDIAN UST](#)

This list of underground storage tanks (USTs) on Tribal/Indian Lands in Region 4, which includes Florida, is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Nov 23, 2022

Delisted Tribal Leaking Storage Tanks:

[DELISTED INDIAN LST](#)

Leaking Underground Storage Tank (LUST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian LUST lists made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Nov 23, 2022

Delisted Tribal Underground Storage Tanks:

[DELISTED INDIAN UST](#)

Underground Storage Tank (UST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian UST lists made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Nov 23, 2022

County

No County databases were selected to be included in the search.

Additional Environmental Record Sources

Federal

Facility Registry Service/Facility Index:

[FINDS/FRS](#)

The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the Environmental Protection Agency (US EPA).

Government Publication Date: Aug 18, 2022

Toxics Release Inventory (TRI) Program:

[TRIS](#)

The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U. S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.

Government Publication Date: Aug 24, 2021

PFOA/PFOS Contaminated Sites:

[PFAS NPL](#)

List of National Priorities List (NPL) and related Superfund Alternative Agreement (SAA) sites where PFOA or PFOS contaminants have been found in water and/or soil. The site listing is provided by the Federal Environmental Protection Agency (EPA).

Government Publication Date: Dec 28, 2022

Federal Agency Locations with Known or Suspected PFAS Detections:

[PFAS FED SITES](#)

List of Federal agency locations with known or suspected detections of Per- and Polyfluoroalkyl Substances (PFAS), made available by the U.S. Environmental Protection Agency (EPA) in their PFAS Analytic Tools data. EPA outlines that these data are gathered from several federal entities, such as the Federal Superfund program, Department of Defense (DOD), National Aeronautics and Space Administration, Department of Transportation, and Department of Energy. Sites on this list do not necessarily reflect the source/s of contamination and detections do not indicate level of risk or human exposure at the site. Agricultural notifications in this data are limited to DOD sites only. At this time, the EPA is aware that this list is not comprehensive of all Federal agencies.

Government Publication Date: Jun 30, 2022

SSEHRI PFAS Contamination Sites:

[PFAS SSEHRI](#)

This PFAS Contamination Site Tracker database is compiled by the Social Science Environmental Health Research Institute (SSEHRI) at Northeastern University. According to the SSEHRI, the database records qualitative and quantitative data from each known site of PFAS contamination, including timeline of discovery, sources, levels, health impacts, community response, and government response. The goal of this database is to compile information and support public understanding of the rapidly unfolding issue of PFAS contamination. All data presented was extracted from government websites, news articles, or publicly available documents, and this is cited in the tracker. Disclaimer: The source conveys this database undergoes regular updates as new information becomes available, some sites may be missing and/or contain information that is incorrect or outdated, as well as their information represents all contamination sites SSEHRI is aware of, not all possible contamination sites. This data is not intended to be used for legal purposes. Limited location details are available with this data. Access the following for the most current informations <https://pfasproject.com/pfas-contamination-site-tracker/>

Government Publication Date: Dec 12, 2019

National Response Center PFAS Spills:

[ERNS PFAS](#)

National Response Center (NRC) calls from 1990 to the most recent complete calendar year where there is indication of Aqueous Film Forming Foam (AFFF) usage. NRC calls may reference AFFF usage in the "Material Involved" or "Incident Description" fields. Data made available by the US Environmental Protection Agency (EPA). Disclaimer: dataset may include initial or misidentified incident data not yet validated or investigated by a federal/state response agency.

Government Publication Date: Feb 23, 2022

PFAS NPDES Discharge Monitoring:

[PFAS NPDES](#)

This list of National Pollutant Discharge Elimination System (NPDES) permitted facilities with required monitoring for Per- and Polyfluoroalkyl (PFAS) Substances is made available via the U.S. Environmental Protection Agency (EPA)'s PFAS Analytic Tools. Any point-source wastewater discharger to waters of the United States must have a NPDES permit, which defines a set of parameters for pollutants and monitoring to ensure that the discharge does not degrade water quality or impair human health. This list includes NPDES permitted facilities associated with permits that monitor for Per- and Polyfluoroalkyl Substances (PFAS), limited to the years 2007 - present. EPA further advises the following regarding these data: currently, fewer than half of states have required PFAS monitoring for at least one of their permittees, and fewer states have established PFAS effluent limits for permittees. For states that may have required monitoring, some reporting and data transfer issues may exist on a state-by-state basis.

Government Publication Date: Feb 19, 2023

Perfluorinated Alkyl Substances (PFAS) from Toxic Release Inventory:

[PFAS TRI](#)

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a Per- or polyfluorinated alkyl substance (PFAS) included in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances. The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment.

Government Publication Date: Aug 24, 2021

Perfluorinated Alkyl Substances (PFAS) Water Quality:

[PFAS WATER](#)

The Water Quality Portal (WQP) is a cooperative service sponsored by the United States Geological Survey (USGS), the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC). This listing includes records from the Water Quality Portal where the characteristic (environmental measurement) is in the Environmental Protection Agency (EPA)'s consolidated Master List of PFAS Substances.

Government Publication Date: Jul 20, 2020

PFAS TSCA Manufacture and Import Facilities:

[PFAS TSCA](#)

The US Environmental Protection Agency (EPA) issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) requiring facilities that manufacture or import chemical substances to report to EPA. This list is specific to TSCA Manufacture and Import Facilities with reported per- and poly-fluoroalkyl substances (PFAS). Data file made available by the EPA and includes CDR/Inventory Update Reporting data from 1998 up to 2020. EPA makes notes the following about these data: this data file includes production and importation data for chemicals identified in EPA's CompTox Chemicals Dashboard list of PFAS without explicit structures and list of PFAS structures in DSSTox. Note that some regulations have specific chemical structure requirements that define PFAS differently than the lists in EPA's CompTox Chemicals Dashboard. Reporting information on manufactured or imported chemical substance amounts should not be compared between facilities, as some companies claim Chemical Data Reporting Rule data fields for PFAS information as Confidential Business Information.

Hazardous Materials Information Reporting System:

HMIRS

US DOT - Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Incidents Reports Database taken from Hazmat Intelligence Portal, U.S. Department of Transportation.

Government Publication Date: Sep 1, 2020

National Clandestine Drug Labs:

NCDL

The U.S. Department of Justice ("the Department"), Drug Enforcement Administration (DEA), provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Aug 30, 2022

Toxic Substances Control Act:

TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).

Government Publication Date: Apr 11, 2019

Hist TSCA:

HIST TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing:

FTTS ADMIN

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing:

FTTS INSP

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List:

PRP

Early in the site cleanup process, the U.S. Environmental Protection Agency (EPA) conducts a search to find the Potentially Responsible Parties (PRPs). The EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site. This listing contains PRPs, Noticed Parties, at sites in the EPA's Superfund Enterprise Management System (SEMS).

Government Publication Date: Jan 25, 2023

State Coalition for Remediation of Drycleaners Listing:

SCRD DRYCLEANER

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin. Since 2017, the SCRD no longer maintains this data, refer to applicable state source data where available.

Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS):

ICIS

The U.S. Environmental Protection Agency's Enforcement and Compliance History Online system incorporates data from the Integrated Compliance Information System - National Pollutant Discharge Elimination System (ICIS-NPDES). ICIS-NPDES is an information management system maintained by the Office of Compliance to track permit compliance and enforcement status of facilities regulated by the NPDES under the Clean Water Act. This data includes permit, inspection, violation and enforcement action information for applicable ICIS records.

Government Publication Date: Oct 15, 2022

Drycleaner Facilities:

FED DRYCLEANERS

A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) data as made available by the U.S. Environmental Protection Agency (EPA), sourced from the ECHO Exporter file. The EPA tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

Government Publication Date: Dec 11, 2022

Delisted Drycleaner Facilities:

DELISTED FED DRY

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

Government Publication Date: Dec 11, 2022

Formerly Used Defense Sites:

FUDS

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DOD) is responsible for an environmental restoration. The FUDS Annual Report to Congress (ARC) is published by the U.S. Army Corps of Engineers (USACE). This data is compiled from the USACE's Geospatial FUDS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) FUDS dataset.

Government Publication Date: Jul 12, 2022

Former Military Nike Missile Sites:

FORMER NIKE

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

Government Publication Date: Dec 2, 1984

PHMSA Pipeline Safety Flagged Incidents:

PIPELINE INCIDENT

A list of flagged pipeline incidents made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types.

Government Publication Date: Mar 31, 2021

Material Licensing Tracking System (MLTS):

MLTS

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Government Publication Date: May 11, 2021

Historic Material Licensing Tracking System (MLTS) sites:

HIST MLTS

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

Mines Master Index File:

MINES

The Master Index File (MIF) is provided by the United State Department of Labor, Mine Safety and Health Administration (MSHA). This file, which was originally created in the 1970's, contained many Mine-IDs that were invalid. MSHA removes invalid IDs from the MIF upon discovery. MSHA applicable data includes the following: all Coal and Metal/Non-Metal mines under MSHA's jurisdiction since 1/1/1970; mine addresses for all mines in the database except for Abandoned mines prior to 1998 from MSHA's legacy system (addresses may or may not correspond with the physical location of the mine itself); violations that have been assessed penalties as a result of MSHA inspections beginning on 1/1/2000; and violations issued as a result of MSHA inspections conducted beginning on 1/1/2000.

Surface Mining Control and Reclamation Act Sites:

[SMCRA](#)

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by the Office of Surface Mining Reclamation and Enforcement (OSMRE) to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of Abandoned Mine Land (AML) impacts, as well as information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

Government Publication Date: Aug 18, 2022

Mineral Resource Data System:

[MRDS](#)

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

Government Publication Date: Mar 15, 2016

DOE Legacy Management Sites:

[LM SITES](#)

The U.S. Department of Energy (DOE) Office of Legacy Management (LM) currently manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The LM manages sites with diverse regulatory drivers (statutes or programs that direct cleanup and management requirements at DOE sites) or as part of internal DOE or congressionally-recognized programs, such as but not limited to: Formerly Utilized Sites Remedial Action Program (FUSRAP), Uranium Mill Tailings Radiation Control Act (UMTRCA Title I, Title II), Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), Resource Conservation and Recovery Act (RCRA), Decontamination and Decommissioning (D&D), Nuclear Waste Policy Act (NWPA). This site listing includes data exported from the DOE Office of LM's Geospatial Environmental Mapping System (GEMS). GEMS Data disclaimer: The DOE Office of LM makes no representation or warranty, expressed or implied, regarding the use, accuracy, availability, or completeness of the data presented herein.

Government Publication Date: Dec 1, 2022

Alternative Fueling Stations:

[ALT FUELS](#)

This list of alternative fueling stations is sourced from the Alternative Fuels Data Center (AFDC). The U.S. Department of Energy's Office of Energy Efficiency & Renewable Energy launched the AFDC in 1991 as a repository for alternative fuel vehicle performance data, which provides a wealth of information and data on alternative and renewable fuels, advanced vehicles, fuel-saving strategies, and emerging transportation technologies. The data includes Biodiesel (B20 and above), Compressed Natural Gas (CNG), Electric, Ethanol (E85), Hydrogen, Liquefied Natural Gas (LNG), Propane (LPG) fuel type locations.

Government Publication Date: Jan 3, 2023

Superfunds Consent Decrees:

[CONSENT DECREES](#)

This list of Superfund consent decrees is provided by the Department of Justice, Environment & Natural Resources Division (ENRD) through a Freedom of Information Act (FOIA) applicable file. This listing includes Consent Decrees for CERCLA or Superfund Sites filed and/or as proposed within the ENRD's Case Management System (CMS) since 2010. CMS may not reflect the latest developments in a case nor can the agency guarantee the accuracy of the data. ENRD Disclaimer: Congress excluded three discrete categories of law enforcement and national security records from the requirements of the FOIA; response is limited to those records that are subject to the requirements of the FOIA; however, this should not be taken as an indication that excluded records do, or do not, exist.

Government Publication Date: Jan 11, 2023

Air Facility System:

[AFS](#)

This EPA retired Air Facility System (AFS) dataset contains emissions, compliance, and enforcement data on stationary sources of air pollution. Regulated sources cover a wide spectrum; from large industrial facilities to relatively small operations such as dry cleaners. AFS does not contain data on facilities that are solely asbestos demolition and/or renovation contractors, or landfills. ECHO Clean Air Act data from AFS are frozen and reflect data as of October 17, 2014; the EPA retired this system for Clean Air Act stationary sources and transitioned to ICIS-Air.

Government Publication Date: Oct 17, 2014

Registered Pesticide Establishments:

[SSTS](#)

List of active EPA-registered foreign and domestic pesticide-producing and device-producing establishments based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that facilities producing pesticides, active ingredients, or devices be registered. The list of establishments is made available by the EPA.

Government Publication Date: Mar 30, 2022

Polychlorinated Biphenyl (PCB) Transformers:

PCBT

Locations of Transformers Containing Polychlorinated Biphenyls (PCBs) registered with the United States Environmental Protection Agency. PCB transformer owners must register their transformer(s) with EPA. Although not required, PCB transformer owners who have removed and properly disposed of a registered PCB transformer may notify EPA to have their PCB transformer de-registered. Data made available by EPA.

Government Publication Date: Oct 15, 2019

Polychlorinated Biphenyl (PCB) Notifiers:

PCB

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: Nov 3, 2022

State

Priority Ranking List:

PRIORITYCLEAN

The Florida Legislature has established a state-funded program to cleanup properties that are contaminated as a result of the operations of a drycleaning facility or wholesale supply facility (Chapter 376, Florida Statutes). The program is administered by the Florida Department of Environmental Protection (FDEP). The statute was sponsored by the drycleaning industry to address environmental, economic, and liability issues resulting from drycleaning solvent contamination. The program provides limited liability protection to the owner, operator and real property owner of drycleaning or wholesale supply facilities for cleanup of drycleaning solvent contamination if the parties meet the eligibility conditions stated in the law.

Government Publication Date: Mar 7, 2022

Dry Cleaning Facilities:

DRYCLEANERS

A listing of dry cleaning facilities registered with the Florida Department of Environmental Protection (FDEP). The information contains facility identification number, site location information, related party (owner) information, and facility type and status. Data is taken from the Storage Tank & Contamination Monitoring database, the registration repository of dry cleaner facility data.

Government Publication Date: Oct 12, 2022

Delisted Dry Cleaning Facilities:

DELISTED DRYCLEANERS

List of sites removed from the drycleaners database made available by the Florida Department of Environmental Conservation (DEC).

Government Publication Date: Oct 12, 2022

Historical Dry Cleaners:

HISTORICAL DRYC

The Florida Department of Environmental Protection (FDEP) provided this historical database of regulated and non-regulated dry cleaning facilities. These facilities were at one time tracked and registered by the FDEP OCULUS Electronic Document Management System as "drums" in the underground storage tank database.

Government Publication Date: Aug 2, 2013

Oil and Hazardous Materials Incidents:

SPILLS

Statewide listing of oil and hazardous materials spills and incidents recorded by the Florida Department of Environmental Protection (FDEP).

Government Publication Date: Jan 17, 2023

Contaminated Sites:

DWM CONTAM

Florida Department of Environmental Protection (FDEP) Division of Waste Management (DWM) listing of active or known sites that include sites requiring cleanup but are not actively being worked on due to the agency's lack of funding (primarily petroleum and drycleaning).

Government Publication Date: Oct 12, 2022

Delisted Contaminated Sites:

DEL CONTAM SITE

List of sites which were once included on the Florida Department of Environmental Protection (FDEP) Division of Waste Management (DWM)'s Contaminated Sites list. As sites on the Contaminated Sites (CS) list are cleaned up or closed under risk based corrective action, they are removed from the CS list.

Government Publication Date: Sep 30, 2015

Aqueous Film Forming Foam (AFFF):

PFAS AFFF

A list of fire fighter training facilities that use or possibly used Aqueous Film Forming Foam (AFFF). This list is made available by the Florida Department of Environmental Protection (DEP).

PFAS Investigation at Federal Facilities:

PFAS

List of sites - including Federal Facilities - in Florida at which either a) there has been confirmed or suspected usage of Aqueous Film Forming Foam (AFFF), or b) the Division of Waste Management has identified as a potential source or environmental impact related to per- and polyfluoroalkyl substances (PFAS). The Florida Department of Environmental Protection (DEP) is committed to the protection of the groundwater resources of the state and the public health and safety of residents. The DEP will continue its efforts to investigate and understand PFAS in the environment and the ecological and human health risks associated with PFAS contamination. Listings made available by the Florida Department of Environmental Protection (DEP).

Government Publication Date: Feb 22, 2023

Ground Water Contamination Areas:

GW CONTAM

List of areas of known groundwater contamination made available by the Florida Department of Environmental Protection (DEP). 38 counties have been delineated primarily for the agricultural pesticide ethylene dibromide (EDB), and to a much lesser extent, volatile organic and petroleum contaminants. Permitted water wells in these areas must meet specific well construction criteria and water testing prior to well use. This dataset only indicates the presence or absence of specific groundwater contaminants and does not represent all known sources of groundwater contamination in the state of Florida.

Government Publication Date: Jan 18, 2023

Underground Injection Control Wells:

UIC

Class I Underground Injection Control (UIC) wells that are currently or were previously active, as well as proposed sites, regulated by the Florida Department of Environmental Protection (FDEP). Class I UIC wells are used to inject nonhazardous waste, hazardous waste (new hazardous waste wells were banned in 1983), or municipal waste below the lowermost underground source of drinking water.

Government Publication Date: Jan 26, 2023

Well Surveillance Program Facilities:

WELL SURVEILLANCE

List of facilities made available by the Florida Health Well Surveillance group. The Well Surveillance group manages several programs to identify and monitor areas in Florida where contaminated drinking water is suspected and may pose a threat to public health. The section coordinates with the County Health Departments (CHDs) to locate potable wells and conduct water sampling for contaminants of concern. The Well Surveillance Section is composed of the State Underground Petroleum Environmental Response Act (SUPER Act), Drinking Water Toxics Program (Toxics), Drycleaner Solvent Cleanup Program (DSCP). Includes locations of known cattle dipping vats.

Government Publication Date: Jan 30, 2023

Cattle Dip Vats:

CDV SOUTHEAST

A list of Cattle Dip Vats in Southeast Florida made available by the Florida Department of Environmental Protection.

Government Publication Date: Jan 19, 2017

Tier 2 Report:

TIER 2

A list of Tier 2 facilities in the state of Florida. The list tracks the inventory of chemicals within a particular facility. This list is provided by the Florida Division of Emergency Management.

Government Publication Date: Jul 22, 2022

Delisted County Records:

DELISTED COUNTY

Records removed from county databases. Records may be removed from the county lists made available by the respective county departments because they are inactive, or because they have been deemed to be below reportable thresholds.

Government Publication Date: Feb 6, 2023

Tribal

No Tribal additional environmental record sources available for this State.

County

No County additional environmental databases were selected to be included in the search.

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

APPENDIX E – HISTORICAL RECORDS DOCUMENTATION

RE: CITY DIRECTORY RESEARCH
Tomahawk Parcel 4
Lake Butler, FL 32054

Thank you for contacting ERIS for an City Directory Search for the site described above. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. We have provided the nearest addresses(s) when adjacent addresses are not listed. If we have searched a range of addresses, all addresses in that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on more highly developed areas. Newly developed areas may be covered in the more recent years, but the older directories will tend to cover only the "central" parts of the city. To complete the search, we have either utilized the ACPL, Library of Congress, State Archives, and/or a regional library or history center as well as multiple digitized directories. These do not claim to be a complete collection of all reverse listing city directories produced.

ERIS has made every effort to provide accurate and complete information but shall not be held liable for missing, incomplete or inaccurate information. To complete this search we used the general range(s) below to search for relevant findings. If you believe there are additional addresses or streets that require searching please contact us at 866-517-5204.

Search Criteria:

ALL of SE 2nd Dr
600-1100 of SE 6th Street
ALL of SE 8th Avenue

ENVIRONMENTAL LIEN REPORT

Order No: 23041100873

The ERIS Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied property information to:

- Search for parcel information and / or legal description
- Search for ownership information
- Research official land title documents recorded at jurisdictional agencies such as recorder's' office, registries of deeds, county clerks' offices, etc.
- Access a copy of the deed
- Search for environmental encumbrance(s) associate with the deed
- Provide a copy of any environmental encumbrance(s) based upon a review of keywords in the instrument(s) (title, parties involved and description)
- Provide a copy of the deed or cite documents reviewed

Thank You for Your Business

Please contact ERIS at **416-510-5204** or **info@erisinfo.com**
with any questions or comments

LIMITATION

This report is neither a guarantee of title, a commitment to insure, or a policy of title insurance. ERIS – Environmental Risk Information Services does not guarantee nor include any warranty of any kind whether expressed or implied, about the validity of all information included in this report since this information is retrieved as it is recorded from various agencies that make it available. The total liability is limited to the fee paid for this report.

WARRANTY DEED

THIS WARRANTY DEED made and executed the 18 day of August, 2022, by LAKE BUTLER DEVELOPMENT CORPORATION, a Florida corporation existing under the laws of Florida, and having its principal place of business at 25 East Main Street, Lake Butler, Florida 32054, hereinafter called the Grantor, to TOMAHAWK LAND II, LLC, a Florida limited liability company, whose mailing address is 14771 SW 58th Drive, Lake Butler, Florida 32054, hereinafter called the Grantee:

WITNESSETH:

That the Grantor, for and in consideration of the sum of TEN AND NO/100 (\$10.00) DOLLARS and other valuable considerations, receipt whereof is hereby acknowledged, by these presents does grant, bargain, sell, alien, remise, release, convey and confirm unto the Grantee, all that certain land situate in Union County, Florida, viz:

SEE SCHEDULE "A" ATTACHED

Tax parcel numbers: 29-05-20-00-000-0390-0 and 32-05-20-00-000-0060-0

This deed is given to and accepted by Grantee subject to all restrictions, reservations, easements, limitations, and mineral rights of record, if any, and all zoning and land use rules, regulations, and ordinances, but this shall not serve to reimpose the same.

TOGETHER WITH all the tenements, hereditaments and appurtenances thereto belonging or in anywise appertaining.

TO HAVE AND TO HOLD, the same in fee simple forever.

AND the Grantor hereby covenants with said Grantee that the Grantor is lawfully seized of said land in fee simple; that it has good right and lawful authority to sell and convey said land; that it hereby fully warrants the title to said land and will defend the same against the lawful claims of all persons whomsoever; and that said land is free of all encumbrances.

IN WITNESS WHEREOF, the Grantor has caused these presents to be executed in its name, and its corporate seal to be hereunto affixed, by its proper officers thereunto duly authorized, the day and year first above written.

Signed, sealed and delivered

SCHEDULE "A"
ATTACHED TO WARRANTY DEED DATED AUGUST 18, 2022
FROM LAKE BUTLER DEVELOPMENT CORPORATION
TO TOMAHAWK LAND II, LLC

PARCEL 1:

A parcel of land lying, being and situate in the South 1/2 of Section 29, Township 5 South, Range 20 East, City of Lake Butler, Union County, Florida, more particularly described as follows:

COMMENCE at the Northeast corner of the South 1/2 of said Section 29, and run South 85 degrees 49 minutes 47 seconds West, along the North line of said South 1/2 of Section 29, a distance of 1058.92 feet to a nail and disk (labeled: LB6995) set at the intersection with the Westerly right of way line of State Road Number 121 (right of way width varies); thence run South 37 degrees 14 minutes 02 seconds West, along said Westerly right of way line, a distance of 34.68 feet to a 5/8 inch iron rod (labeled: LB6995) set at the intersection of the apparent Southerly right of way line of NE 107th Terrace (right of way width not known), and at the POINT OF BEGINNING of the hereinafter described parcel of land: Thence continue running South 37 degrees 14 minutes 02 seconds West, continuing along said Westerly right of way line, a distance of 1555.64 feet to a 5/8 inch iron rod (labeled: LB6995) set at a Point of Intersection; thence run South 36 degrees 44 minutes 02 seconds West, continuing along said Westerly right of way line, a distance of 621.31 feet to a 5/8 inch iron rod (labeled: LB6995) set at a Point of Non Tangent Curve to the right; thence run Southwesterly, continuing along said Westerly right of way line, a distance of 555.06 feet as measured along the arc of a curve concave Northwesterly and having a radius of 1876.86 feet, said arc being subtended by a chord having a bearing of South 54 degrees 56 minutes 12 seconds West and a distance of 553.04 feet, to a 5/8 inch iron rod (labeled: LB6995) set at a Point of Tangency; thence run South 63 degrees 24 minutes 32 seconds West, continuing along said Westerly right of way line, a distance of 173.42 feet to a 5/8 inch iron rod (labeled: LB6995) set at a jog widening in said Westerly right of way line; thence run North 26 degrees 35 minutes 28 seconds West, continuing along said Westerly right of way line, along said jog widening, a distance of 17.00 feet to a set 5/8 inch iron rod (labeled: LB6995); thence run South 63 degrees 24 minutes 32 seconds West, continuing along said Westerly right of way line, a distance of 86.04 feet to a 5/8 inch iron rod (labeled: LB6995) set at a Point of Curvature to the right; thence run Southwesterly, continuing along said Westerly right of way line, a distance of 216.40 feet as measured along the arc of a curve concave Northwesterly and having a radius of 553.11 feet, said arc being subtended by a chord having a bearing of South 74 degrees 37 minutes 02 seconds West and a distance of 215.02 feet, to a 5/8 inch iron rod (labeled: LB6995) set at a Point of Tangency; thence run South 85 degrees 49 minutes 32 seconds West, continuing along said Westerly right of way line, a distance of 136.35 feet to a 5/8 inch iron rod (labeled: LB6995) set at a Point of Non Tangent Curve to the left, and at the intersection with the North right of way line of State Road Number 100; thence run Westerly, now along said North right of way line of State Road Number 100, a distance of 241.93 feet as measured along the arc of a curve concave Southerly and having a radius of 2924.79 feet, said arc being subtended by a chord having a bearing of South 88 degrees 11 minutes 43 seconds West and a distance of 241.86 feet, to a 5/8 inch iron rod

(labeled: LB6995) set at a Point of Tangency; thence run South 85 degrees 49 minutes 32 seconds West, continuing along said North right of way line of State Road Number 100, a distance of 75.41 feet to a 1/2 inch iron rod (no identification) found at the Southeast corner of a parcel of land identified as Tax Parcel ID: 29-05-20-00-000-0392-0; thence run North 02 degrees 22 minutes 16 seconds West, along the East line of said Tax Parcel, a distance of 202.29 feet to a 1/2 inch iron rod (no identification) found at the intersection with the South right of way line of Northeast 1st Street (60' right of way); thence run North 85 degrees 36 minutes 47 seconds East, along said South right of way line of Northeast 1st Street, and along the South line of a parcel of land identified as Tax Parcel ID: 29-05-20-00-000-0380-0, a distance of 459.70 feet to a 4 inch square concrete monument (no identification) found at the southeast corner of said Tax Parcel; thence run North 02 degrees 24 minutes 28 seconds West, along the East line of said Tax Parcel ID: 29-05-20-00-000-0380-0, and along its Northerly projection, a distance of 1858.41 feet to a 5/8 inch iron rod (labeled: LB6995) set at the intersection with the aforesaid North line of the South 1/2 of Section 29, and at the Northeast corner of a parcel of land identified as Tax Parcel ID: 29-05-20-00-000-0090-0; thence run North 85 degrees 49 minutes 47 seconds East, along said North line of the South 1/2 of Section 29, a distance of 1639.35 feet to a 5/8 inch iron rod (labeled: LB6995) set at the intersection with the aforesaid apparent Southerly right of way line of NE 107th Terrace (right of way width not known); thence run South 78 degrees 43 minutes 43 seconds East, along said apparent Southerly right of way line, a distance of 80.43 feet to a set 5/8 inch iron rod (labeled: LB6995); thence run North 85 degrees 52 minutes 39 seconds East, continuing along said apparent Southerly right of way line, a distance of 529.66 feet to a set 5/8 inch iron rod (labeled: LB6995); thence run South 89 degrees 31 minutes 41 seconds East, continuing along said apparent Southerly right of way line, a distance of 51.36 feet to the POINT OF BEGINNING.

AND

PARCEL 2:

Legal "A"

A parcel of land lying, being and situate in the Southwest 1/4 of Southeast 1/4 of Section 29, Township 5 South, Range 20 East, City of Lake Butler, Union County, Florida, more particularly described as follows:

COMMENCE at a 5/8 inch iron rod (labeled: LB6995) found at the Northeast corner of said Southwest 1/4 of Southeast 1/4 of Section 29, for the POINT OF BEGINNING of the hereinafter described parcel of land: Thence run South 01 degree 02 minutes 13 seconds East, along the East line of said Southwest 1/4 of Southeast 1/4 of Section 29, a distance of 1257.16 feet to a 5/8 inch iron rod (labeled: LB6995) set at the intersection with the apparent Northerly right of way line of NE 101st Trail (right of way width unknown); thence run South 76 degrees 21 minutes 44 seconds West, along said apparent Northerly right of way line, a distance of 74.18 feet to a set 5/8 inch iron rod (labeled: LB6995); thence run South 85 degrees 25 minutes 48 seconds West, continuing along said apparent Northerly right of way line, a distance of 589.45 feet to a 5/8 inch iron rod (labeled: LB6995) set at the intersection with the Northerly right of way line of State Road Number 100; thence run North 59 degrees

34 minutes 58 seconds West, along said Northerly right of way line of State Road Number 100, a distance of 280.90 feet to a Point of Curvature of a curve to the left having a radius of 1697.90 feet; thence run Northwesterly, continuing along said Northerly right of way line of State Road Number 100, a distance of 152.77 feet as measured along the arc of a curve concave Southwesterly and having a radius of 1697.90 feet, said arc being subtended by a chord having a bearing of North 62 degrees 09 minutes 37 seconds West and a distance of 152.72 feet, to a 1/2 inch iron rod (identification unreadable), found at the Southeast corner of that certain parcel of land identified as Tax Parcel ID: 29-05-20-00-000-0391-0, and described in a deed recorded in O. R. Book 311, Page 628, Public Records of Union County, Florida; thence run North 36 degrees 15 minutes 59 seconds East, along the Easterly boundary of said parcel of land identified as Tax Parcel ID: 29-05-20-00-000-0391-0, a distance of 194.46 feet to a 5/8 inch iron rod (labeled: LB6995) set at the Northeast corner of said parcel of land identified as Tax Parcel ID: 29-05-20-00-000-0391-0; thence run North 54 degrees 02 minutes 59 seconds West, along the Northerly boundary of said parcel of land identified as Tax Parcel ID: 29-05-20-00-000-0391-0, a distance of 350.00 feet to a nail and disk (identification unreadable) found at the intersection with the Easterly right of way line of State Road Number 121; thence run North 36 degrees 44 minutes 02 seconds East, along said Easterly right of way line of State Road Number 121, a distance of 872.93 feet to a 5/8 inch iron rod (labeled: LB6995) found at the intersection with the North line of said Southwest 1/4 of Southeast 1/4 of Section 29; thence run North 86 degrees 00 minutes 46 seconds East, along said North line of the Southwest 1/4 of Southeast 1/4 of Section 29, a distance of 662.00 feet to the POINT OF BEGINNING.

AND

Legal "B"

A parcel of land lying, being and situate in the Southwest 1/4 of Southeast 1/4 of Section 29, Township 5 South, Range 20 East, City of Lake Butler, Union County, Florida, more particularly described as follows:

COMMENCE at a 5/8 inch iron rod (labeled: LB6995) found at the Northeast corner of said Southwest 1/4 of Southeast 1/4 of Section 29, and run South 01 degree 02 minutes 13 seconds East, along the East line of said Southwest 1/4 of Southeast 1/4 of Section 29, a distance of 1257.16 feet to a 5/8 inch iron rod (labeled: LB6995) set at the intersection with the apparent Northerly right of way line of NE 101st Trail (right of way width unknown); thence continue running South 01 degree 02 minutes 13 seconds East, continuing along said East line of the Southwest 1/4 of Southeast 1/4 of Section 29, a distance of 60.53 feet to a 5/8 inch iron rod (labeled: LB6995) set at the intersection with the apparent Southerly right of way line of said NE 101st Trail, and to the POINT OF BEGINNING of the hereinafter described parcel of land: Thence continue running South 01 degree 02 minutes 13 seconds East, continuing along said East line of the Southwest 1/4 of Southeast 1/4 of Section 29, a distance of 12.12 feet to a 5/8 inch iron rod (labeled: LB6995) set at the Southeast corner of said Southwest 1/4 of Southeast 1/4 of Section 29; thence run South 86 degrees 11 minutes 39 seconds West, along the South line of said Section 29, a distance of 582.48 feet to a 5/8 inch iron rod (labeled: LB6995) set at the intersection with the Northerly right of way line of State Road Number 100; thence run North 59 degrees 34 minutes 58 seconds West, along said Northerly

right of way line of State Road Number 100, a distance of 19.72 feet to a 5/8 inch iron rod (labeled: LB6995) set at the intersection with said apparent Southerly right of way line of NE 101st Trail; thence run North 85 degrees 43 minutes 26 seconds East, along said apparent Southerly right of way line, a distance of 482.15 feet to a set 5/8 inch iron rod (labeled: LB6995); thence run North 87 degrees 38 minutes 02 seconds East, continuing along said apparent Southerly right of way line, a distance of 117.27 feet to the POINT OF BEGINNING.

AND

PARCEL 3:

That portion of NE1/4 of NW1/4 lying South of old Starke-Lake Butler public road and North and West of State Road 121, Section 32, Township 5 South, Range 20 East.

The ERIS **Physical Setting Report - PSR** provides comprehensive information about the physical setting around a site and includes a complete overview of topography and surface topology, in addition to hydrologic, geologic and soil characteristics. The location and detailed attributes of oil and gas wells, water wells, public water systems and radon are also included for review.

The compilation of both physical characteristics of a site and additional attribute data is useful in assessing the impact of migration of contaminants and subsequent impact on soils and groundwater.

Disclaimer

This Report does not provide a full environmental evaluation for the site or adjacent properties. Please see the terms and disclaimer at the end of the Report for greater detail.

Geologic Units

This maps shows geologic units in the area. Please refer to the report for detailed descriptions.

Geologic Information

The previous page shows USGS geology information. Detailed information about each unit is provided below.

Geologic Unit TQu

Unit Name:	Undifferentiated sediments
Unit Age:	Pliocene/Pleistocene
Primary Rock Type:	sand
Secondary Rock Type:	clay or mud
Unit Description:	Undifferentiated sediments - Undifferentiated Tertiary-Quaternary Sediments - These sediments are siliciclastics that are separated from undifferentiated Quaternary sediments solely on the basis of elevation. Based on the suggestion that the Pleistocene sea levels reached a maximum of approximately 100 feet (30 meters) msl (Colquhoun, 1969), these sediments, which occur above 100 feet (30 meters) msl, are predominantly older than Pleistocene but contain some sediments reworked during the Pleistocene. This unit may include fluvial and aeolian deposits. The undifferentiated Tertiary-Quaternary sediments occur in a band extending from the Georgia-Florida state line in Baker and Columbia Counties southward to Alachua County. These sediments are gray to blue green, unconsolidated to poorly consolidated, fine to coarse grained, clean to clayey, unfossiliferous sands, sandy clays and clays. Organic debris and disseminated organics are present in these sediments. The undifferentiated Tertiary-Quaternary sediments are part of the surficial aquifer system.

Geologic Unit Thc

Unit Name:	Hawthorn Group, Coosawhatchie Formation
Unit Age:	Miocene
Primary Rock Type:	sand
Secondary Rock Type:	clay or mud
Unit Description:	Coosawhatchie Formation - The Coosawhatchie Formation is exposed or lies beneath a thin overburden on the eastern flank of the Ocala Platform from southern Columbia County to southern Marion County. Within the outcrop region, the Coosawhatchie Formation varies from a light gray to olive gray, poorly consolidated, variably clayey and phosphatic sand with few fossils, to an olive gray, poorly to moderately consolidated, slightly sandy, silty clay with few to no fossils. Occasionally the sands will contain a dolomitic component and, rarely, the dominant lithology will be dolostone or limestone. Silicified nodules are often present in the Coosawhatchie Formation sediments in the outcrop region. The sediment may contain 20 percent or more phosphate (Scott, 1988). Permeability of the Coosawhatchie sediments is generally low, forming part of the intermediate confining unit/aquifer system.

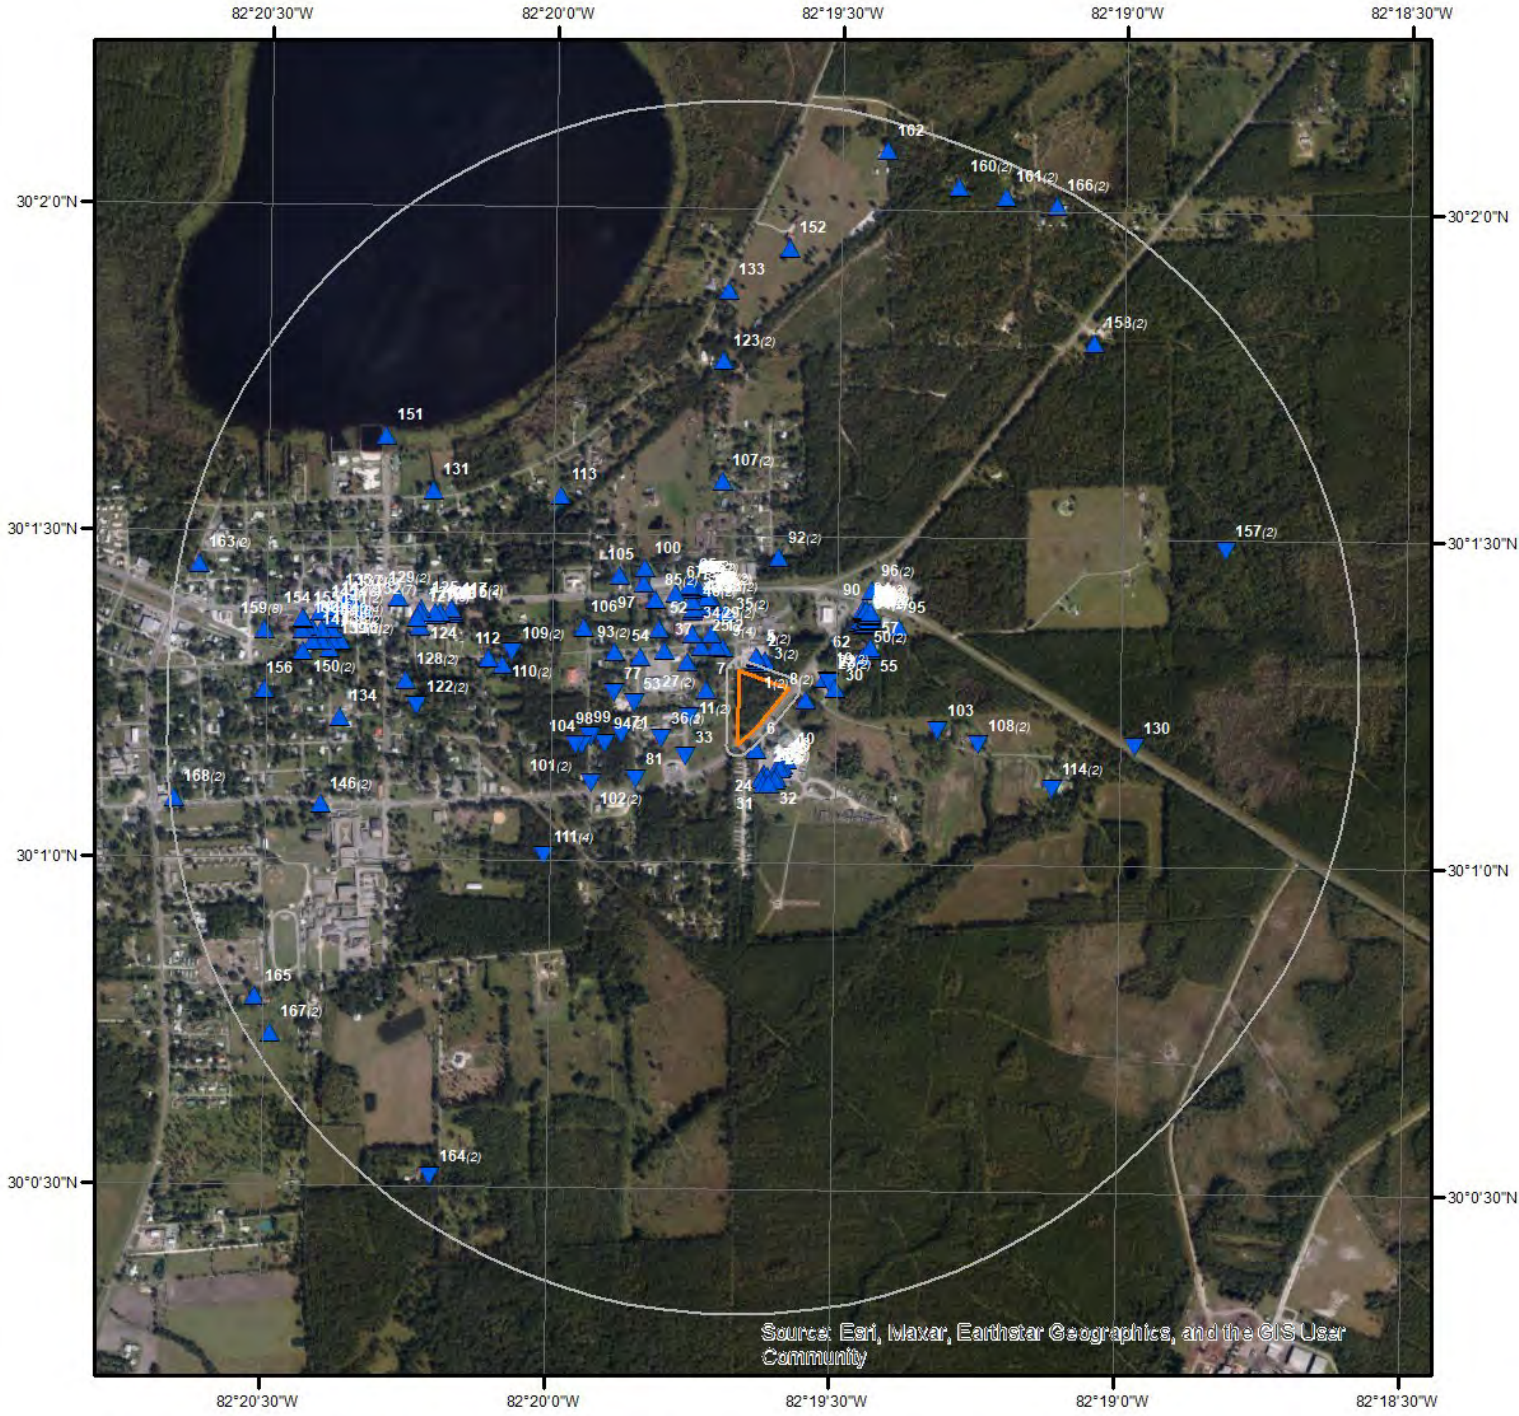

Soil Information

Soil Information

The previous page shows a soil map using SSURGO data from USDA Natural Resources Conservation Service. Detailed information about each unit is provided below.

No records found for the project property or surrounding properties.

Radon Information

This section lists any relevant radon information found for the target property.

Federal EPA Radon Zone for *UNION* County: **2**

Zone 1: Counties with predicted average indoor radon screening levels greater than 4 pCi/L

Zone 2: Counties with predicted average indoor radon screening levels from 2 to 4 pCi/L

Zone 3: Counties with predicted average indoor radon screening levels less than 2 pCi/L

Federal Area Radon Information for *UNION* County

No Measures/Homes:	18
Arithmetic Mean:	0.7
Standard Deviation:	0.5
Maximum:	1.6
% >4 pCi/L:	-
% >8 pCi/L:	-
% >12 pCi/L:	-
Notes on Data Table:	TABLE 2. Indoor radon results from the Florida population-based radon survey, by county.

Federal Sources

FEMA National Flood Hazard Layer

FEMA FLOOD

The National Flood Hazard Layer (NFHL) data incorporates Flood Insurance Rate Map (FIRM) databases published by the Federal Emergency Management Agency (FEMA), and any Letters Of Map Revision (LOMRs) that have been issued against those databases since their publication date. The FIRM Database is the digital, geospatial version of the flood hazard information shown on the published paper FIRMs. The FIRM Database depicts flood risk information and supporting data used to develop the risk data. The FIRM Database is derived from Flood Insurance Studies (FISs), previously published FIRMs, flood hazard analyses performed in support of the FISs and FIRMs, and new mapping data, where available.

Indoor Radon Data

INDOOR RADON

Indoor radon measurements tracked by the Environmental Protection Agency(EPA) and the State Residential Radon Survey.

Public Water Systems Violations and Enforcement Data

PWSV

List of drinking water violations and enforcement actions from the Safe Drinking Water Information System (SDWIS) made available by the Drinking Water Protection Division of the US EPA's Office of Groundwater and Drinking Water. Enforcement sensitive actions are not included in the data released by the EPA. Address information provided in SWDIS may correspond either with the physical location of the water system, or with a contact address.

Radon Zone Level

RADON ZONE

Areas showing the level of Radon Zones (level 1, 2 or 3) by county. This data is maintained by the Environmental Protection Agency (EPA).

Safe Drinking Water Information System (SDWIS)

SDWIS

The Safe Drinking Water Information System (SDWIS) contains information about public water systems as reported to US Environmental Protection Agency (EPA) by the states. Addresses may correspond with the location of the water system, or with a contact address.

Soil Survey Geographic database

SSURGO

The Soil Survey Geographic database (SSURGO) contains information about soil as collected by the National Cooperative Soil Survey at the Natural Resources Conservation Service (NRCS). Soil maps outline areas called map units. The map units are linked to soil properties in a database. Each map unit may contain one to three major components and some minor components.

U.S. Fish & Wildlife Service Wetland Data

US WETLAND

The U.S. Fish & Wildlife Service Wetland layer represents the approximate location and type of wetlands and deepwater habitats in the United States.

USGS Current Topo

US TOPO

US Topo topographic maps are produced by the National Geospatial Program of the U.S. Geological Survey (USGS). The project was launched in late 2009, and the term "US Topo" refers specifically to quadrangle topographic maps published in 2009 and later.

USGS Geology

US GEOLOGY

Seamless maps depicting geological information provided by the United States Geological Survey (USGS).

USGS National Water Information System

FED USGS

The U.S. Geological Survey (USGS)'s National Water Information System (NWIS) is the nation's principal repository of water resources data. This database includes comprehensive information of well-construction details, time-series data for gage height, streamflow, groundwater level, and precipitation and water use data.

Wells from NWIS

FED USGS

The U.S. Geological Survey's National Water Information System (NWIS) is the nation's principal repository of water resources data. The NWIS includes comprehensive information of well-construction details, time-series data for gage height, streamflow, groundwater level, and precipitation and water use data. This NWIS dataset contains select Site Types from the overall NWIS Sites data, limited to the following Group Site Types only: Groundwater Group Site Types: Well, Collector or Ranney type well, Hyporheic-zone well,

Appendix

Interconnected Wells, Multiple wells; Spring Group Site Type: Spring; and Other Group Site Types: Aggregate groundwater use, Cistern.

State Sources

Florida Subsidence Incident Reports

SINKHOLES

A list of Florida Subsidence Incidents made available by the Florida Department of Environmental Protection (DEP) and maintained by the Florida Geological Survey. Sinkholes are closed depressions in areas underlain by soluble rock such as limestone, dolostone, and in some states gypsum and salt. Other subterranean events can cause holes, depressions, or subsidence of the land surface that may mimic sinkhole activity. Commonly, a reported depression is not verified by a licensed professional geologist to be a true sinkhole, and the cause of subsidence is not known. Such an event is called a subsidence incident.

Oil and Gas Wells

OGW

The Oil and Gas Program is the permitting authority within the Florida Department of Environmental Protection's Mining and Minerals Regulation Program. Companies interested in exploration or production of hydrocarbons in Florida are regulated by the Oil and Gas Program. This data is made available by Florida Department of Environmental Protection's Oil and Gas program.

Public Water Supply Wells

PWSW

The Public Water Supply Wells (PWSW) data consist of public water supply facilities and their wells in Florida. This data is made available by Florida Department of Environmental Protection, Water Compliance Assurance Program.

Underground Injection Control Wells

UIC

Class I Underground Injection Control (UIC) wells that are currently or were previously active, as well as proposed sites, regulated by the Florida Department of Environmental Protection (FDEP). Class I UIC wells are used to inject nonhazardous waste, hazardous waste (new hazardous waste wells were banned in 1983), or municipal waste below the lowermost underground source of drinking water.

Water Use Permits Sites - South Florida Water Management District

WELLS

List of Water Use Permitting Facilities consisting of wells, pumps and culverts, made available by the South Florida Water Management District. The facilities represent a subset of all wells, pumps and culverts associated with Water Use Permits. A Water Use Permit is required for all water uses except single family and duplex use and fire fighting.

Water Well Completions - Northwest Florida Water Management District

WATER WELLS

A list of existing well permits provided by the Northwest Florida Water Management District, representing records for wells permitted for construction/repair/abandonment beginning in the year 1976; does not typically contain data on wells constructed prior to 1976. The data provided may therefore only represent a fraction of existing wells. The data are provided by water well contractors on completion reports and, in most cases, has not been verified by District staff.

Water Well Completions - St. Johns River Water Management District

WATER WELLS

A list of wells in the Water Well Completion Report database made available by the St. Johns River Water Management District (SJRWMD). The SJRWMD advises that data reported in the Water Well Completion Report are obtained from multiple sources, including SJRWMD, delegated counties, and other regulatory agencies; that they cannot assure that contributors have used consistent measurement techniques or adhered to approved quality control standards; and that, although the SJRWMD has made reasonable attempts to assure the quality of the data contained herein, in most cases, the information is reported as received.

Water Well Completions - Suwanee River Water Management District

WELLS

A list of wells in the Water Well Completion Report database made available by the Suwanee River Water Management District department (SRWMD). The SRWMD advises that data reported in the Water Well Completion Report are obtained from multiple sources, including SRWMD, delegated counties, and other regulatory agencies; that they cannot assure that contributors have used consistent measurement techniques or adhered to approved quality control standards; and that, although the SRWMD has made reasonable attempts to assure the quality of the data contained herein, in most cases, the information is reported as received.

Water Well Construction Permits

WELL CONST PERM

Appendix

A list of water well construction permits issued by the St. Johns River Water Management District (SJRWMD).

Water Well Construction Permits - Southwest Florida Water Management District

WATER WELLS

Locations of well construction sites permitted within the District, including historical sites. A Well Construction Permit is required prior to installation of a water well within the District. The permits ensure that wells are constructed by qualified contractors and meet rigid safety and durability standards.

Water Wells - Suwanee River Water Management District

WATER WELLS

A list of water wells made available by the Suwanee River Water Management District department (SRWMD). The SRWMD advises that data are obtained from multiple sources including SRWMD, delegated counties, and other regulatory agencies; that they cannot assure that contributors have used consistent measurement techniques or adhered to approved quality control standards; and that, although the SRWMD has made reasonable attempts to assure the quality of the data contained herein, in most cases, the information is reported as received.

Well Surveillance Program Water Wells

WATER WELLS

A list of privately and publicly owned potable wells from the Florida Department of Health's (DOH) Well Surveillance Program.

Liability Notice

Reliance on information in Report: The Physical Setting Report (PSR) DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a review of environmental databases and physical characteristics for the site or adjacent properties.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS Information Inc. disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. TOPOGRAPHIC MAPS

Project Property: Tomahawk Parcel 4
Tomahawk Parcel 4
Lake Butler FL 32054

Project No: 20165101.Task 7

Requested By: PPM Consultants, Inc.

Order No: 23041100873

Date Completed: April 11, 2023

We have searched USGS collections of current topographic maps and historical topographic maps for the project property. Below is a list of maps found for the project property and adjacent area. Maps are from 7.5 and 15 minute topographic map series, if available.

Year	Map Series
2021	7.5
2015	7.5
1993	7.5
1984	7.5
1966	7.5

Topographic Map Symbology for the maps may be available in the following documents:

APPENDIX F – OTHER DOCUMENTATION

HAZARDOUS WASTE TRANSPORTER

CERTIFICATE OF APPROVAL

This is to certify that the carrier specified below has been approved as a hazardous waste transporter in Florida. The terms and conditions of this certificate require that the holder comply with all applicable portions of Chapter 62-730, Florida Administrative Code. This certificate shall be rendered null and void if any information contained within becomes obsolete. The certificate shall remain valid through the expiration date specified below.

TRANSPORTER: Bulldog Environmental, Inc.
EPA ID NUMBER: FLR 000 020 552
FACILITY ADDRESS: 1050 Southeast 6th Street
Lake Butler, Florida 32054
INSURANCE CARRIER: National Reliance Indemnity Company
INSURANCE POLICY #: NKA 1630170
EFFECTIVE DATE: April 4, 1996
EXPIRATION DATE: March 22, 1997
APPROVED TRANSFER FACILITY: No

APPROVAL ISSUED BY: Joan M. Flint DATE: August 12, 1996
Joan M. Flint
Hazardous Waste Management Section
904/488-0300

SUMMARY OF VIOLATIONS

The following are violations of the Florida Administrative Code Sections 62-730.160 and 62-730.180 which adopt and incorporate by reference Title 40 Code of Federal Regulations (CFR) Parts 262 and 265.

40 CFR 262.34(d)(5)(ii) - Accumulation Time

- (d) A generator who generates greater than 100 kilograms but less than 1000 kilograms of hazardous waste in a calendar month may accumulate hazardous waste on-site for 180 days or less without a permit or without having interim status provided that:
- (5) The generator complies with the following requirements:
- (ii) The generator must post the following information next to the telephone:
- (A) The name and telephone number of the emergency coordinator;
 - (B) Location of fire extinguishers and spill control material, and, if present, fire alarm; and
 - (C) The telephone number of the fire department, unless the facility has a direct alarm.

VIOLATION: Facility failed to post the name and telephone number of the emergency coordinator and the location of fire extinguishers and spill control equipment near a telephone.

40 CFR 262.42(b) - Exception Reporting

- (b) A generator of greater than 100 kilograms, but less than 1000 kilograms of hazardous waste in a calendar month who does not receive a copy of the manifest with the handwritten signature of the owner or operator of the designated facility within 60 days of the date the waste was accepted by the initial transporter must submit a legible copy of the manifest, with some indication that the generator has not received confirmation of delivery, to the EPA Regional Administrator for the Region in which the generator is located.

NOTE: The submission to EPA need only be a handwritten or typed note on the manifest itself, or on an attached sheet of paper, stating that the return copy was not received.

VIOLATION: The facility failed to file an exception report for manifest number 00724.

40 CFR 265.37 - Arrangements with Local Authorities

- (a) The owner or operator must attempt to make the following arrangements, as appropriate for the type of waste handled at his facility and the potential need for the services of these organizations:
- (1) Arrangements to familiarize police, fire departments, and emergency response teams with the layout of the facility, properties of hazardous waste handled at the facility and associated hazards, places where facility personnel would normally be working, entrances to roads inside the facility, and possible evacuation routes;
 - (2) Where more than one police and fire department might respond to an emergency, agreements designating primary emergency authority to a specific police and specific fire department, and agreements with any others to provide support to the primary emergency authority;
 - (3) Agreements with State emergency response teams, emergency response contractors, and equipment suppliers; and
 - (4) Arrangements to familiarize local hospitals with the properties of hazardous waste handled at the facility and the types of injuries or illnesses which could result from fires, explosions, or releases at the facility.
- (b) Where State or local authorities decline to enter into such arrangements, the owner or operator must document the refusal in the operating record.

VIOLATION: The facility has not made arrangements with local authorities.

Pritchett Trucking, Inc.
Hazardous Waste Inspection of
July 27, 1995
Page Five

RECOMMENDED CORRECTIVE ACTION:

40 CFR 262.34(d)(5)(ii)

- No further action is necessary. Subsequent to the inspection, facility provided a copy of its modified contingency plan to the Department.

40 CFR 262.42(b)

- No further action is necessary. Subsequent to the inspection, facility provided a copy of manifest number 00724 signed by the designated facility.

40 CFR 265.37

- No further action is necessary. Subsequent to the inspection, facility provided documentation to the Department that arrangements had been made with the local authorities

SUMMARY OF VIOLATIONS AND CORRECTIVE ACTIONS:

40 CFR 262.11 Hazardous Waste Determination

VIOLATION:

Facility failed to adequately characterize spent anti-freeze.

CORRECTIVE ACTION:

The facility indicated in its January 26, 2000 letter that it would test the waste antifreeze prior to disposal for Toxicity Characteristic Leaching Procedure (TCLP) contaminants lead, benzene, tetrachloroethylene and trichloroethylene pursuant to 40 CFR.261.24. The test will then bring the facility into compliance provided that the waste antifreeze is managed appropriately. No further action is required at this time. The facility is reminded that it may recycle the used antifreeze in order to eliminate the need for testing the waste to see whether or not it is a hazardous waste.

40 CFR 263.20 The Manifest System

VIOLATION:

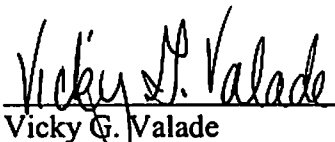

Facility failed to include transporter information for Prichett Trucking, Inc. on the manifests.

CORRECTIVE ACTION:

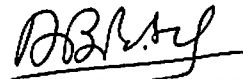

Facility is in compliance per a January 26, 2000, letter.

Subject: Site Rehabilitation Completion Order
Pritchett Trucking, Inc.
1050 SE 6th Street
Lake Butler, Union County
FDEP Facility ID# 638838183
Discharge Date: March 31, 1992 (PCPP)
Discharge Score: 45

Dear Mr. Pritchett:

The Petroleum Restoration Program (PRP) has reviewed the Site Assessment Letter Report (SAR) dated June 23, 2017 (received June 23, 2017) Source Removal Report dated February 11, 2019 (received February 11, 2019), the Natural Attenuation Monitoring Report with No Further Action Proposal (NFAP) dated November 11, 2021 (received November 11, 2021) and the Monitoring Well Abandonment Report dated March 3, 2022 (received March 3, 2022), for the petroleum product discharge referenced above. All the documents submitted to date are adequate to meet the site assessment requirements of Rule 62-780.600, Florida Administrative Code (F.A.C.). In addition, documentation submitted with the SARs/NFAP confirms that criteria set forth in Subsection 62-780.680(1), F.A.C., have been met. Please refer to the attached maps of the source property and analytical summary tables, Exhibits A and B respectively and hereby incorporated by reference. The SARs/NFAP are hereby incorporated by reference in this Site Rehabilitation Completion Order (Order). Therefore, you are released from any further obligation to conduct site rehabilitation at the facility for petroleum product contamination associated with the discharge referenced above, except as set forth below.

In the event concentrations of contaminants of concern are detected above the levels approved in this Order, the Department will reevaluate the contamination and make a determination as to whether the increase is due to a new release or from a previously reported discharge. If from a previously eligible discharge, the Department may reinstate State-funded site or discharge rehabilitation to reduce concentrations of contaminants of concern to the levels approved in the Order or otherwise allowed by Chapter 62-780, F.A.C., in accordance with the State-funded eligibility provisions that are applicable for the site or discharge. If a new or subsequent discharge occurs at the facility that is not eligible for state funding, the contamination must be evaluated and addressed as provided in Chapter 62-780, F.A.C.

NOTICE OF RIGHTS

This action is final and effective on the date filed with the Clerk of the Department unless a petition for an administrative hearing is timely filed under Sections 120.569 and 120.57, F.S., before the deadline for filing a petition. On the filing of a timely and sufficient petition, this action will not be final and effective until a subsequent order of the Department. Because the administrative hearing process is designed to formulate final agency action, the subsequent order may modify or take a different position than this action.

Petition for Administrative Hearing

A person whose substantial interests are affected by the Department's action may petition for an administrative proceeding (hearing) under Sections 120.569 and 120.57, F.S. Pursuant to Rules 28-106.201 and 28-106.301, F.A.C., a petition for an administrative hearing must contain the following information:

- (a) The name and address of each agency affected and each agency's file or identification number, if known;
- (b) The name, address, any e-mail address, any facsimile number, and telephone number of the petitioner, if the petitioner is not represented by an attorney or a qualified representative; the name, address, and telephone number of the petitioner's representative, if any, which shall be the address for service purposes during the course of the proceeding; and an explanation of how the petitioner's substantial interests will be affected by the agency determination;
- (c) A statement of when and how the petitioner received notice of the agency decision;
- (d) A statement of all disputed issues of material fact. If there are none, the petition must so indicate;
- (e) A concise statement of the ultimate facts alleged, including the specific facts that the petitioner contends warrant reversal or modification of the agency's proposed action;
- (f) A statement of the specific rules or statutes that the petitioner contends require reversal or modification of the agency's proposed action, including an explanation of how the alleged facts relate to the specific rules or statutes; and
- (g) A statement of the relief sought by the petitioner, stating precisely the action that the petitioner wishes the agency to take with respect to the agency's proposed action.

The petition must be filed (received by the Clerk) in the Office of General Counsel of the Department at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida 32399-3000, or via electronic correspondence at Agency_Clerk@FloridaDEP.gov. Also, a copy of the petition shall be mailed to the addressee at the address indicated above at the time of filing.

Time Period for Filing a Petition

In accordance with Rule 62-110.106(3), F.A.C., petitions for an administrative hearing by the addressee must be filed within 21 days of receipt of this written notice. Petitions filed by any persons other than the addressee must be filed within 21 days of publication of the notice or within 21 days of receipt of the written notice, whichever occurs first. You cannot justifiably rely on the finality of this decision unless notice of this decision and the right of substantially affected persons to challenge this decision has been duly published or otherwise provided to all persons substantially affected by the decision. While you are not required to publish notice of this action, you may elect to do so pursuant Rule 62-110.106(10)(a).

The failure to file a petition within the appropriate time period shall constitute a waiver of that person's right to request an administrative determination (hearing) under Sections 120.569 and 120.57, F.S., or to

intervene in this proceeding and participate as a party to it. Any subsequent intervention (in a proceeding initiated by another party) will be only at the discretion of the presiding officer upon the filing of a motion in compliance with Rule 28-106.205, F.A.C. If you do not publish notice of this action, this waiver may not apply to persons who have not received a clear point of entry.

Extension of Time

Under Rule 62-110.106(4), F.A.C., a person whose substantial interests are affected by the Department's action may also request an extension of time to file a petition for an administrative hearing. The Department may, for good cause shown, grant the request for an extension of time. Requests for extension of time must be filed with the Office of General Counsel of the Department at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida 32399-3000, or via electronic correspondence at Agency_Clerk@FloridaDEP.gov, before the deadline for filing a petition for an administrative hearing. A timely request for extension of time shall toll the running of the time period for filing a petition until the request is acted upon.

Mediation

Mediation is not available in this proceeding.

Judicial Review

Once this decision becomes final, any party to this action has the right to seek judicial review pursuant to Section 120.68, F.S., by filing a Notice of Appeal pursuant to Florida Rules of Appellate Procedure 9.110 and 9.190 with the Clerk of the Department in the Office of General Counsel (Station #35, 3900 Commonwealth Boulevard, Tallahassee, Florida 32399-3000) and by filing a copy of the Notice of Appeal accompanied by the applicable filing fees with the appropriate district court of appeal. The notice must be filed within 30 days from the date this action is filed with the Clerk of the Department.

Questions

Any questions regarding the PRP's review of the SARs/NFAP should be directed to John Cullinan at 352-264-6821. Questions regarding legal issues should be referred to the Department's Office of General Counsel at 850-245-2242. Contact with any of the above does not constitute a petition for an administrative hearing or a request for an extension of time to file a petition for an administrative hearing.

The FDEP Facility Number for this facility is 638838183. Please use this identification on all future correspondence with the Department.

Dear Mr. Pittman:

Union County Bus Barn
DEP/EPA ID FLR 000 049 361
Union County- Hazardous Waste

Thank you for your assistance during the hazardous waste RCRA compliance inspection conducted by the department at your facility on October 13, 1998. Enclosed are the report and inspection checklist which document this inspection. The Union County Bus Barn was found to be in violation of Florida State regulations applicable to generators of used oil. These violations are set forth in the attached inspection report. Subsequent to the inspection, the facility submitted documents indicating that the violations cited has been corrected. Since the facility has returned to compliance, no enforcement action will be taken. In order to maintain compliance with hazardous waste regulations, the facility is encouraged to use the inspection checklist to perform periodic facility compliance audits.

Your continued cooperation is appreciated. If you have any questions regarding this report or hazardous waste regulations in general, please contact me at (904) 448-4320, ext. 369.

Sincerely,

Patricia M. Correa

"Protect, Conserve and Manage Florida's Environment and Natural Resources"

PROCESS DESCRIPTION:

The Union County Bus Barn is the maintenance facility servicing the 27 school buses serving the Union County School Board. The facility consists of one large building on a large parcel of land. This inspection was unannounced and in response to a complaint.

The facility performs routine maintenance work on the school buses. The facility has a parts washer filled with diesel to clean parts that are dirty. When the diesel is too dirty to use, it is added to a drum collecting used oil. At the time of the inspection, the facility had five drums of used oil accumulating (Photo A). None of the drums were labeled with the words, "Used Oil." **This is a violation of 40 CFR 279.22(c)(1).** On top of the drums, and on the visible soil beside the five drums of used oil, there was an accumulation of released used oil (Photos A and B). **The used oil left on the drums and on the ground are violations of 40 CFR 279.22(d)(3), which requires that used oil generators clean up and properly manage released used oil.** Used oil is recycled by Four Way Oil of Cairo, Georgia. The facility collects used oil filters in drums and the filters are recycled by Four Way Oil of Cairo, Georgia. At the time of the inspection, the facility had three drums collecting used oil filters (Photo C and D). None of the drums were labeled "Used Oil Filters." **This is a violation of 62-710.850(6)(a) which requires that used oil filters shall be stored in above ground containers which are clearly labeled "Used Oil Filters."**

This inspection was in response to a complaint regarding the handling of used diesel and used oil. Based upon the information gathered from this inspection, the Union County Bus Barn was found to be a non-handler of hazardous waste. Specifically, there was an allegation that diesel was being disposed of along the fenceline and that used oil was being burned in a pit on the property. At the time of the inspection, it appeared that the complaint was not valid. The fenceline had distressed vegetation, but according to Mr. Pittman, Manager, this was a result of the use of an herbicide by the hospital on the adjacent property (Photo E). There was no pit on the property nor was there evidence of any burning of used oil. The only violations noted were used oil storage and management and used oil filter storage.

AREA OF CONCERN:

The facility appears to be a collection site for used and excessed computer equipment for the local school board. As shown in Photo F, this equipment has been placed in a large pile outside on the property. A copy of this report is being forwarded to the Union County School Board. The CRT's and CPU's are recyclable materials, and the best management practice for these items is to send them to a used computer recycling facility. The School Board is advised to seek out a recycling facility, or proper disposal facility, for this solid waste.

SUMMARY OF VIOLATIONS AND RECOMMENDED CORRECTIVE ACTIONS:

40 CFR 279.22(c)(1) - Used oil storage

- **VIOLATION:**
Facility failed to label the five drums of used oil accumulating at the facility with the words "Used Oil."

CORRECTIVE ACTION:
No further action is necessary. Subsequent to the inspection, the facility submitted documentation indicating that the five drums were labeled with the words, "Used Oil."

40 CFR 279.22(d) - Response to Releases

VIOLATION:
Facility failed to contain, clean-up and properly manage the used oil released on the ground around the five drums of used oil accumulating at the facility.

CORRECTIVE ACTION:
No further action is necessary. Subsequent to the inspection, the facility submitted documentation indicating that the released used oil was properly contained and cleaned up.

62-710.850(6)(a) - Management of Used Oil Filters

- **VIOLATION:**
Facility failed to label the three drums of used oil filters accumulating at the facility with the words "Used Oil Filters."

CORRECTIVE ACTION:

No further action is necessary. Subsequent to the inspection, the facility submitted documentation indicating that the three drums were labeled with the words, "Used Oil Filters."

USED OIL GENERATOR CHECKLIST

Facility Name: Union County Bus Barn Date: OCT-13, 1998
 Facility Representative: MIKE PITTMAN Facility ID #: FLR000049361
 SIC Codes: 4151 Inspector: P. CORREA

40 CFR 279 Subpart C -- Generator Standards

1. Describe the facility's used oil streams:

WASTE DESCRIPTION	ON/Off Specification	Testing or Process Knowledge	Generation Rate	Disposal Facility and EPA ID
used oil	-	-		
used oil filters	-	-		

2. Does the generator mix hazardous waste with the used oil?(279.10) Y ___ N ✓
3. If so, is the facility a CESQG? Y ___ N N/A
4. If not, Is the oil mixed with a characteristic hazardous waste? (describe waste) Y ___ N N/A
- If so, does the facility document that the resultant mixture does not exhibit any characteristic of hazardous waste? Y ___ N N/A
- Or, if the hazardous waste is only D001, that the resultant mixture is not ignitable? Y ___ N N/A
- If the facility is not a CESQG, and oil is mixed with a listed hazardous waste, it must be managed as a hazardous waste.
5. Does the facility generate other materials contaminated with used oil? Y ___ N ✓
- If so, are the materials burned for energy recovery as used oil? Y ___ N N/A
- or, Does the facility have records documenting the residuals are not hazardous waste? Y ___ N N/A
6. Does the generator claim that the used oil meets the specification in 279.11? Y ___ N ✓
- If so, and the oil is to be burned for energy recovery, the generator is a marketer subject to 40 CFR 279 Subpart H

Subpart C

1. Does the facility store used oil only in tanks, containers or permitted hazardous waste storage units? Y N
 Are containers/tanks in good condition? (279.22(b)(1)) Y N
 Are containers/tanks leaking? (279.22(b)(2)) Y N
 Are containers/tanks storing used oil marked with the words "Used Oil", including fill pipes used to fill underground tanks? (279.22(c)) Y N * see report

2. Are used oil filters stored in above ground containers which are: (62-710.850(6))
 In good condition? Y N
 Closed or otherwise protected from weather? Y N
 Labeled "Used Oil Filters"? Y N * see report
 Stored on an oil impervious surface? Y N

3. Have any releases to the environment occurred, other than a leak from a UST? Y N } * see report
 If so, did the facility stop the release, contain the oil, clean up the release and manage the contaminated material properly and repair or replace the leaking units prior to returning them to service? (279.22(d)) Y N

4. Does the generator burn on site in a space heater? (279.23) Y N
 If so, does he burn only DIY oil or oil generated on site? Y N N/A
 Does the heater have a capacity of no more than 0.5 million BTU/hr? Y N N/A
 Are combustion gasses vented to the atmosphere? Y N N/A

5. Does the generator only use transporters who have received EPA Identification numbers?
 Name and number FOUR WAY

6. If not, does the generator self-transport only used oil generated on site or DIY oil to used oil collection centers or aggregation point owned by the generator? Y N
 Name and location of center: _____
 Location of generator aggregation point _____

- If so, is this only in vehicles owned by the facility or facility employees? Y N
 Is no more than 55 gallons transported at one time? Y N

7. Alternatively, does the generator have a tolling arrangement with a used oil reclaimer? Y N
 Is a copy of the contract kept on site specifying type and frequency of shipments? Y N
 that the transport vehicle is owned by the processor? Y N
 that the reclaimed oil will be returned to the generator? Y N

Outstanding Violations

Significance Name: Minor
Rule Number(s): 62-762.701(6)
Violation Text: Secondary containment not repaired per 762.501(1)(e).
Explanation: The sealant on the secondary containment is cracked and peeling.
Corrective Action: Repair the sealant.

Significance Name: Minor
Rule Number(s): 62-761.820(2)(e)
Violation Text: Contaminated soil not excavated, disposed of or stockpiled, is managed in accordance with Chapter 62-770, FAC.
Explanation: There is petroleum stained soil at the fueling station.
Corrective Action: The contaminated soil should be dug up and properly disposed of.

Significance Name: **SNC-B**
Rule Number(s): **62-762.601(1)(d)**
Violation Text: **Release detection not performed at least once a month.**
Explanation: **The monthly visual inspections were not performed since January 2009.**
Corrective Action: **Perform monthly inspections and record your findings.**

Significance Name: Minor
Rule Number(s): 62-761.510(1)(b)3.
Violation Text: Fillboxes color not coded by 12/31/98.
Explanation: The fill ports should be color coded.
Corrective Action: The fill ports must be color coded; color codes are as follows:
Yellow for low sulphur diesel or yellow with a blue stripe for high sulphur diesel.
Gasoline codes are white with a black cross for regular, red with a white cross for premium and blue with a white cross for plus.

Significance Name: Minor
Rule Number(s): 62-762.401(2)(a)6.
Violation Text: Registration placard is not displayed in plain view.
Explanation: There was no current registration placard on site.
Corrective Action: Properly display the placard.

Inspection Comments

05/19/2009 I have received the insurance policy and CFR.

I have received a signed statement that the stormwater has been drawn off and that it will be drawn off again as necessary.

I have received a signed statement saying that release detection would be performed monthly, that contaminated soil would be excavated, that the fill port would be color coded, and that the placard would be properly displayed.

We understand that a contract has been signed to reline the secondary containment.

A second non compliance letter citing the violations accompanies this inspection report; please find it attached. Please provide our office with documentation confirming the resolution of the cited violations within thirty days of receipt of this inspection report and attached non compliance letter. If you have any questions or concerns, please feel free to contact me at (386) 758-2140 or email Benjamin_Shulaw @doh.state.fl.us .

Gasoline codes are white with a black cross for regular, red with a white cross for premium and blue with a white cross for plus.

Inspection Comments

09/17/2009 At the time of this re-inspection There were no current insurance records on site.

The fill ports still have not been color coded.

The drain for the secondary containment was open.

The placard is properly displayed.

The sealant on the secondary looks good.

Release detection is being performed monthly.

I didn't see contaminated soil at the time.

Chapter(s) 62-761/762, F.A.C., Non-Compliance Letter
Columbia County – Regulated Storage Tanks
Union Cnty School Bd Bus Garage
255 SE 8th Ave
Lake Butler, FL 32054 DEP Facility #8519167

Dear Mr Parrish:

The FDOH is contracted with the Florida Department of Environmental Protection (Department) to conduct the Storage Tank System Compliance Verification Program for facilities located in *Union* County. On November 30, 2010 a storage tank annual inspection was conducted at the above referenced facility. Based on the inspection, you may not be operating in compliance with the requirements of Chapter(s) 62-761/762, Florida Administrative Code (F.A.C.).

Violations: No insurance documentation.
Keep the insurance and Certificate of Financial Responsibility at the facility for inspection.

Standing water, dirt and trash inside the containment area.
Keep containment clean and dry.

The drain valve was open.
Keep valve closed except when draining water.

Comments: The ASTs are stucked for product level. There is no platform to stand on for that activity. It would be safer if there were such a platform.

Discharge Information: PCPP active score 29

A non compliance letter citing the violations accompanies this inspection report; please find it attached. Please provide our office with documentation confirming the resolution of the cited violations within thirty days of receipt of this inspection report and attached non compliance letter. For more inspection details and information, please see the copy of the inspection field notes. If you have any questions please contact me at 386-623-0831 cell, fax 386-758-2187, or office 386-758-2140 or email Benjamin_Shulaw@doh.state.fl.us

Any noncompliance items must be corrected immediately. Please provide a written response to this office within 30 days of receipt of this letter and provide documentation to show that the issues addressed in the enclosed report and in this letter have been resolved. Please include the facility identification number on all correspondence. Your failure to timely respond may result in further enforcement action.

Please be aware that violations of Chapter(s) 62-761/762, F.A.C., may subject you to penalties of up to \$10,000.00 per day per violation, in addition to investigative costs. These penalties and costs may be imposed in accordance with Chapters 376 and 403, Florida Statutes.

If you have any questions please contact me at 386-623-0831 cell, fax 386-758-2187, or office 386-758-2140 or email Benjamin_Shulaw@doh.state.fl.us

Violation Text: Secondary containment not repaired per 762.501(1)(e).
Explanation: The secondary sealant is peeling.
Corrective Action: Re-seal with an approved sealant.

Site Visit Comments

04/11/2012

New Violations: The new insurance docs were unavailable. Send them to my office.

There is water in the containment and water is routinely left in the containment. Drain and clean the algae out of the secondary.

Facility ID: 8519167

Site Visit Comments

The secondary sealant is peeling. Re-seal with an approved sealant.

Comments: Remove water from secondary within 2 weeks after a rain.

ASTs are showing some rust, pipes look good. There is staining around the dispenser area outside containment that should be removed. Hoses good. The Krueger product level gauges need new caps.

Discharge Information: PCPP inactive score 29

APPENDIX G – QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

GREGORY P. STOVER, P.G.
SENIOR TECHNICAL CONSULTANT

Mr. Stover has 37 years of experience as a geologist, and serves as a Senior Technical Consultant with PPM. Mr. Stover declares that to the best of his professional knowledge and belief, he meets the definition of *Environmental Professional* as defined in §3.12.10 of 40 CFR 312, to wit: Mr. Stover earned a Bachelor of Science in Geology from Auburn University in 1979; has held a current Professional Geologist's license from a state since 1989 (Florida, Arkansas, Louisiana, Alabama, and Mississippi); and has 30 years of full-time relevant experience.

Since January 1988, Mr. Stover has performed, managed, supervised, and provided QA/QC reviews for several thousand Phase I and Phase II Environmental Site Assessments (ESA) conducted at a variety of facilities including gasoline stations, auto shops, auto dealerships, soda bottling plants, printers, dry cleaners, indoor and outdoor shooting ranges, paper mills, cotton gins, bulk terminals, oil and gas production fields, wood treatment facilities, asphalt plants, quarries and mines, light and heavy manufacturing factories, railroad terminals, roundhouses, tracks, and spurs, office/warehouses, high-rise office buildings, hotels, hospitals and medical offices, Research & Development facilities, aerospace facilities, former military airfields, private airports, private and public schools, apartment complexes, city-owned housing projects, strip shopping centers and malls, agricultural land, large and small tract timberlands, and EPA-funded brownfields. Mr. Stover has acted as an *Environmental Professional* in the performance of Phase I and II ESAs in 25 states with emphasis on EPA Regions 4 and 6. Mr. Stover has worked for and/or to satisfy the requirements of users, stakeholders, and regulators including owners, purchasers, banks, lawyers, brokers, other consultants, cities, parishes/counties, councils of government, state and local regulatory agencies, HUD, DOE, DOD, SBA, FEMA and the EPA. Mr. Stover applies his expertise in hydrogeology, organic chemistry, and chemical fate and transport to his extensive list of projects involving the assessment and remediation of petroleum products and hazardous substances including gasoline, diesel, bunker oil, polynuclear aromatic compounds, coal tar, heavy metals, PCBs, herbicides, pesticides, and chlorinated solvents.

Mr. Stover has been responsible for developing standard field forms, report formats, and training to support the company-wide use of the ASTM E 1527 Standard Practice for Phase I ESAs and the All Appropriate Inquiry (AAI) Rule since these standards were first published in 1993 and 2005. Mr. Stover is a member of ASTM Committee E50.

Mr. Stover is also proficient with non-ASTM scope items including asbestos-containing building materials, radon, lead-based paint, mold, wetlands, historical resources, and the National Environmental Policy Act (NEPA) of 1969. Mr. Stover also has extensive remediation experience including the use of technologies such as dual-phase vacuum extraction, air sparging, soil vapor extraction, ozone sparging, enhanced bioremediation, excavation, solidification and stabilization, land farming, natural attenuation, and risk assessment.

Simplifying the Complex
